Annex EU CR4 - Standardised Approach: Credit risk exposure and CRM effects	68
Annex EU CR5 – Standardized approach: exposures by risk weight	69
Annex EU CQ3 - Credit quality of performing and non-performing exposures by past due days	71
Annex EU CQ4 - Quality of non-performing exposures by geography	73
Annex EU CQ5 - Credit quality of loans and advances to non-financial corporations by industry	74
Annex EU MR1 - Market risk under the standardized approach	75
Annex EU IRRBB - Interest rate risks of non-trading book activities	76
Annex EU OR1 - Operational risk own funds requirements and risk-weighted exposure amounts	77
Annex EU AE1 - Encumbered and unencumbered assets	78
Annex EU AE2 - Collateral received and own debt securities issued	79
Annex EU AE3 - Sources of encumbrance	80
Annex EU REM1 - Remuneration awarded for the financial year	81
Annex EU REM4 - Remuneration of 1 million EUR or more per year	82
Annex EU REM5 - Information on remuneration of identified staff	83
Annex ESG 1 -Transition risks from counterparty exposure	84
Annex ESG 6 - Summary of GAR KPIs	88
Annex ESG 7 - Mitigating actions: Assets for the calculation of GAR	89
Annex ESG 8 - GAR (%)	93
Annex ESG 10 - Other climate change mitigating actions that are not covered in the EU Taxonomy	95

Concise risk statement

The Adyen DNA

We are a technology company redefining payments. We work together with over 4,196 people spread across 27 offices around the world. At Adyen, “winning is more important than ego” means that we value people for their skills and what they bring to the company, not for their titles. We work with cross-functional teams and empower them to make their own decisions. Across our three key commercial pillars – Digital, Unified Commerce, and Platforms – the Adyen team assesses customer needs, as well as looks to the market to uncover trends, challenges, and opportunities. Innovating across these pillars enables us to keep pace in a fast-paced and ever-evolving commercial landscape. Our end-to-end, in-house built tech stack is engineered for speed and flexibility, enabling us to iterate at speed.

Description of Business Activities

The Adyen platform integrates the full payments stack (gateway, risk management, processing, acquiring and settlement) with a common back-end infrastructure for authorizing payments across its merchants' sales channels as well as offering feature-rich APIs. This integrated platform allows for the delivery of products and services on a global scale with local capabilities, directly connecting merchants to Visa, Mastercard and many other payment methods, and across sales channels, including its merchants' online, mobile and POS channels, while providing a high level of reliability, security, performance and data insights. In 2023, Adyen increased its scope by rolling out a suite of embedded financial products (EFP) which equip platform businesses to deliver innovative financial products to their users. These products are designed to complement the current acquiring and issuing services and are aimed at solving for merchants' challenges within the payment flow. These include the development of cash advances, bank account offerings and issuing card. These offerings will improve merchants' experience and reduce their barriers to growth related to working capital challenges.

Risk management

Adyen recognizes that there are risks associated with achieving its strategy and business objectives. Managing these risks¹ is an essential part of doing business. Adyen has adopted a uniform and systematic company-wide approach for managing risks. Adyen's integral risk management framework is based on the Enterprise Risk Management (ERM) model as issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in 2017.

Capital

In Pillar I, Adyen uses the standardized approach for credit and market risk categories, and the Basic Indicator Approach (BIA) for operational risk to determine its minimum regulatory capital requirements. As a result of Adyen's business model, operational risk is the largest risk category in terms of risk weighted assets. The total risk exposure amount at 31 December 2023 was EUR 4,673 million.

The capital requirements need to be covered by sufficient own funds. Adyen's own funds consist fully of CET1 capital, which was EUR 2,609 million at 31 December 2023. This resulted in a CET1 capital ratio of 55.8%.²

Leverage

Adyen's leverage ratio was 27.5% at year-end 2023, which is well above the requirement of 3%.

¹ Art. 435(1)(e)(f) CRR.

² Upon formal confirmation, Adyen's net profit for H2 2023 (EUR 416 million) may be included in its CET1 calculation. At that point, Adyen's CET1 capital becomes EUR 3,026 million, resulting in a CET1 capital ratio of 64.8%.

Liquidity Coverage Ratio (LCR)

The Liquidity Coverage Ratio of Adyen was 1,341% at the end of 2023, well above the regulatory threshold of 100%.

Net Stable Funding Ratio (NSFR)

At year-end 2023 Adyen's NSFR was 292.6%, well above the regulatory threshold of 100%.

Declaration of the Management Board

The Management Board of Adyen declares that the risk management arrangements of Adyen are adequate with regards to Adyen's risk profile and strategy. The development of Adyen's risk profile is in line with the risk tolerances set by the Management Board.

Introduction

This document presents the consolidated Transparency and Disclosure Report 2023 (Pillar III report) of Adyen N.V. (Adyen) as per 31 December 2023.³

As a 'less significant institution'⁴ based in the European Union, Adyen operates under the Capital Requirements Directive IV (CRD IV) and Capital Requirements Regulation (CRR), including the recent amendments to this framework as documented in CRR II⁵ and CRD V⁶. This framework is based on a three-pillars concept:

- Pillar I – Minimum capital requirements
- Pillar II – Supervisory review
- Pillar III – Market disclosures

In Pillar I, the capital requirements are calculated on the basis of standard components of three categories of risk that an institution faces: credit risk, market risk and operational risk. These capital requirements need to be covered by sufficient own funds. Adyen uses the standardized approach for credit and market risk categories, and the Basic Indicator Approach for operational risk to determine its minimum regulatory capital requirements.

In Pillar II, the supervisor reviews the viability of Adyen and its ability to meet the reporting requirements. This Supervisory Review and Evaluation Process (SREP) comprises four components:

- Business Model Assessment (BMA)
- Internal governance and institution-wide control assessment
- Internal Capital Adequacy Assessment Process (ICAAP)
- Internal Liquidity Adequacy Assessment Process (ILAAP)

As Pillar II inherently implies supervisory judgment, it is a more principle-based standard that addresses institution-specific risks and details capitalization against these risks. The capital requirements from Pillar II should be proportionate to the risk profile of Adyen, and as such also reflect the volatility to risks under adverse and changing business conditions.

The Pillar III disclosure framework seeks to promote market discipline through regulatory disclosure requirements. Pursuant to Part Eight of the CRR, Adyen is required to publicly disclose information regarding, amongst others, its risk profile, risk management and capital adequacy. Adyen discloses this information by means of this Pillar III report. The Pillar III disclosures have a reference date of December 31, 2023.

The content of this Pillar III report meets all the requirements laid down in CRR and corresponding delegated regulations and guidelines. This report has not been audited by Adyen's external auditor.

Scope of consolidation

As an EU parent institution, Adyen N.V. is required to publish a consolidated Pillar III report. Adyen reports its prudential requirements both on a consolidated as well as on a stand-alone basis. Its subsidiaries are only included in its consolidated reporting. Adyen's prudential scope of consolidation does not deviate from its IFRS scope of consolidation. Adyen N.V. is a licensed Credit Institution by De Nederlandsche Bank (the Dutch Central Bank) and registered in the Netherlands under company number 34259528. The Credit Institution license includes the ability to provide cross-border services in the EEA. Adyen N.V. directly or indirectly owns 100% of the shares of, and therefore controls all entities included in the consolidated financial statements. This means all branches, representative offices and subsidiaries are fully consolidated.

Adyen has offices in the Netherlands, Brazil, Singapore, Canada, Australia, Hong Kong, Mexico, China, Malaysia, India, Japan and United Arab Emirates with branches in Germany, France, Sweden, United Kingdom and the United States, and representative offices in Belgium, Poland, Czech Republic, Italy, and Spain. The address of the Adyen N.V. registered office is Simon Carmiggeltstraat 6-50, 5th floor, 1011DJ Amsterdam, the Netherlands. Table 1 and 2

Scope of prudential application

Adyen's capital and liquidity requirements apply to the individual as well as to the consolidated basis. Based on Part One Title II of the CRR, institutions must comply with the solvency and liquidity requirements at all their applicable consolidation levels.

Adyen maintains a centralized approach in managing its capital and liquidity and the Adyen risks arise from Adyen's single, global platform that is developed and managed at the Amsterdam headquarters. The single platform represents not only Adyen's technological set-up but also Adyen's business model. In line with this centralized approach and given that the eligible own funds amounts of the individual level and consolidated level are equal, DNB as the home regulator focuses on the assessments of the risks on a consolidated basis and applies the resulting prudential requirements to the individual level also. This is in line with the conservative monitoring approach applied by Adyen for these requirements; which was to harmonize and monitor compliance to the most stringent.

Revised Pillar III disclosure framework

The Basel Committee on Banking Supervision (BCBS) announced in 2014 its aim to revise and consolidate the Pillar III disclosure requirements, and as such bundle the previously scattered instructions in an "all-inclusive Implementing Technical Standard". This started as a two-phase program, but was extended with a third phase in 2017 to include disclosure requirements arising from the ongoing finalization of the Basel III reforms. The previously existing Pillar III disclosure requirements are superseded.

In order to be legally binding, the Revised Pillar III Framework templates were transposed into EU requirements. Article 434a CRR mandates the EBA to develop disclosure templates and instructions for disclosure requirements under Titles II and III of Part Eight CRR. Comprehensive Implementing Technical Standards on disclosure were developed as a result as per ITS 2021/637. This ITS includes most new disclosure requirements per updated CRR, with the most notable exception being related to Environmental, Social and Governance (ESG) risk prudential disclosures. On 24 January 2022 EBA published its final draft ITS/2022/01 on ESG risks disclosures under the Pillar III framework that specifies uniform formats and associated instructions for the disclosure of this information. This requirement became effective from June 2022.

In table 3, Adyen's disclosures within this Pillar III report are linked to the respective provisions of Part Eight of the CRR. It also references the relevant (fixed format) disclosure templates for Adyen as per the ITS. Adyen has chosen to address most relevant flexible format templates in the report text itself. This text can be found in the referenced section's pages in table 3. Note that not all ITS templates are relevant to Adyen as a result of its business model.

Risk management framework and strategy

Adyen recognizes that risks are associated with achieving its strategy and business objectives. Managing these risks is an essential part of doing business. This chapter describes Adyen's uniform and systematic company-wide approach for managing risks. In addition, it lays down Adyen's risk governance, which sets the tone for, reinforces the importance of, and establishes oversight responsibilities for risk management.

Risk management objectives and policies

Adyen's integral risk management framework⁹ is based on the Enterprise Risk Management (ERM) model as issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in 2017. The integral risk management framework structures the risk management activities within Adyen with a view of identifying, assessing, managing, monitoring and reporting risks in a uniform manner.

Three lines model

In line with the European Banking Authority (EBA) Guidelines on Internal Governance and the publication of the Institute of Internal Auditors (IIA), Adyen has adopted the three lines model which reflects the segregation between operations (first line management), the risk management and compliance functions (second line), and the independent internal audit function (third line). The first line management designs, implements, executes and monitors the control activities to manage performance and the risks taken to achieve Adyen's objectives. The second line risk and compliance functions provide guidance on risk management requirements, and independently evaluate adherence to defined standards. The third line internal audit function provides independent assurance on the effectiveness of risk management, including control activities, by performing audits. The head of internal audit reports directly to the chairman of the Audit and Risk Committee, which provides an indirect line of reporting to the CEO. Adyen follows the EBA guidelines on internal governance and has implemented structural measures and controls to realize the appropriate authority, independence and statute of its risk management functions.

During 2023, the second and third-line functions have continued to add resources in line with the overall growth of the organization as well as the broadening of its services offering and corresponding risk profile.

Strategy and objective setting

Risk management, strategy and objective-setting work together in the strategic planning process. Operational objectives put strategy into practice while serving as a basis for identifying, assessing, and responding to risk at the inherent and residual risk levels. Adyen's risk appetite is established and aligned with its strategy as these are mutually informative.

Risk appetite

Adyen has translated its view on all of its main risks into risk appetite statements. Risk appetite is the amount of residual risk Adyen is willing to accept in pursuit of its objectives. It defines the level of risk at which appropriate actions are needed to reduce risk to an acceptable level. Risk appetite is therefore not static, nor are the risk types for which internal risk limits and risk statements are set. The risk appetite statements on financial and operational risks were updated given the introduction of Embedded Financial Products in 2023.

The risk appetite statements for 2023 were approved by the Management Board and Supervisory Board. Adyen's overall risk appetite is best reflected in the phrase that it wants to build an ethical and sustainable business, whilst being risk aware and not unduly risk averse. Adyen accepts that in order to achieve its strategic objectives it may consume some amounts of capital while investing in new assets, people and processes. In pursuance of its strategic objectives Adyen furthermore values a solid financial and capital outlook. Both capital and leverage should therefore be at a comfortable level above the regulatory requirements.

⁹ Art. 435(1) CRR.

Risk assessment and control activities

Adyen performs a top-down company-wide risk assessment on (at minimum) an annual basis, which includes the identification of key risks that could potentially affect the strategy and business objectives. The purpose hereof is to identify which risks could potentially affect the organization over time, both individually and collectively, in order to focus attention on the most important threats and opportunities. Following EBA guidelines, the key risks are categorized as follows:

- Strategic and business risk
- Operational risk (including technology and integrity risks)
- Financial risk (including credit risk, market risk, liquidity and funding risk)

For a more detailed description of the key risks as identified and assessed by Adyen, refer to the Section "Risk Factors" within the Annual Report 2023. During the year Adyen also undertakes a multitude of specific, local and/or focused risk analyses and assessments that complement the company-wide risk assessments. An example of a focused risk analysis is the systematic integrity risk analysis (SIRA) which is performed at least annually.

Adyen has established a control environment that provides an appropriate foundation for achieving the company's objectives and effectively mitigating risks. Control activities are the policies and procedures that help ensure risks are mitigated and Adyen's objectives are achieved. Adyen uses COSO's internal control integrated framework as a reference for its design, implementation and evaluation of control activities as part of a system of internal control.

Adyen has established a resilience framework, in which Adyen plans and organizes for its course of business under various operational and financial conditions. This is how topics such as business continuity management and financial recovery are addressed. The resilience framework contains a number of focused contingency plans, such that these provide easily accessible and practical guidance when needed.

Review and revision

By reviewing its performance, Adyen evaluates how well the risk management components are functioning over time. The Risk Committee plays a key role in supporting the Management Board with overseeing the effectiveness of Adyen's risk management. It carries out this role by monitoring Adyen's risk profile against the risk appetite, which is an ongoing and iterative process supported by the risk management function. A framework of risk limits and early warning indicators supports this process. Any material risk limit breach that places Adyen at risk of exceeding its risk appetite and, in particular, of putting at risk Adyen's financial health, is escalated promptly to the Management Board. Combinations of ongoing and separate evaluations are used to determine if the components of internal control are present and functioning effectively. The ongoing evaluations are built into Adyen's business processes and provide timely information. The separate evaluations, including independent management testing, are conducted periodically and may vary in scope and frequency depending on the risks and effectiveness of these ongoing evaluations. Any identified deficiencies are discussed within the Risk Committee and reported to the Management Board along with relevant findings, recommendations and remediation plans.¹⁰

¹⁰ Art. 435(2)(e) CRR.

Governance arrangements

Adyen's governance sets the tone, reinforces the importance of, and establishes oversight responsibilities for risk management. Adyen has established a governance which is consistent with the size, complexity and risk profile of the company. Adyen's governance structure is guided by Dutch statutory requirements, the 2022 Dutch Corporate Governance Code (the Code), European Banking Association (EBA) Guidelines on Internal Governance and (inter)national best practices. As Adyen is operating globally, international developments are closely monitored.

Adyen maintains a two-tier board structure consisting of a Management Board and a Supervisory Board, each of which have specific responsibilities. The Management Board is collectively responsible for the overall management, which includes, among others, developing and executing Adyen's strategy and risk management policy based on sustainable long-term value creation, and setting and achieving Adyen's objectives. The Supervisory Board oversees and advises the Management Board, and can give guidance to its general development. Each board is accountable to the General Meeting for the performance of its duties.

Adyen's governance¹¹ is reflected in internal rules and regulations, including the Articles of Association (Statuten), the Management Board By-Laws, the Supervisory Board By-Laws and the Terms of Reference of our Supervisory Board committees.

The risk governance structure is consistent for all risks relevant to Adyen, with specialist committees supporting the Management Board. The Compliance Committee monitors Adyen's integrity risks, the Disclosure Committee is responsible for reviewing Adyen's financial information for compliance with legal and regulatory requirements prior to publication, the Merchant Risk Committee monitors the financial risks related to merchants and the Risk Committee monitors all risk categories. The second line risk management function for (non-) financial risks (including market, credit and operational risk) is fulfilled by the Corporate Risk team.

Figure 1 below outlines Adyen's organizational structure and relation between the Supervisory Board and its committees, the Management Board and the rest of the company.

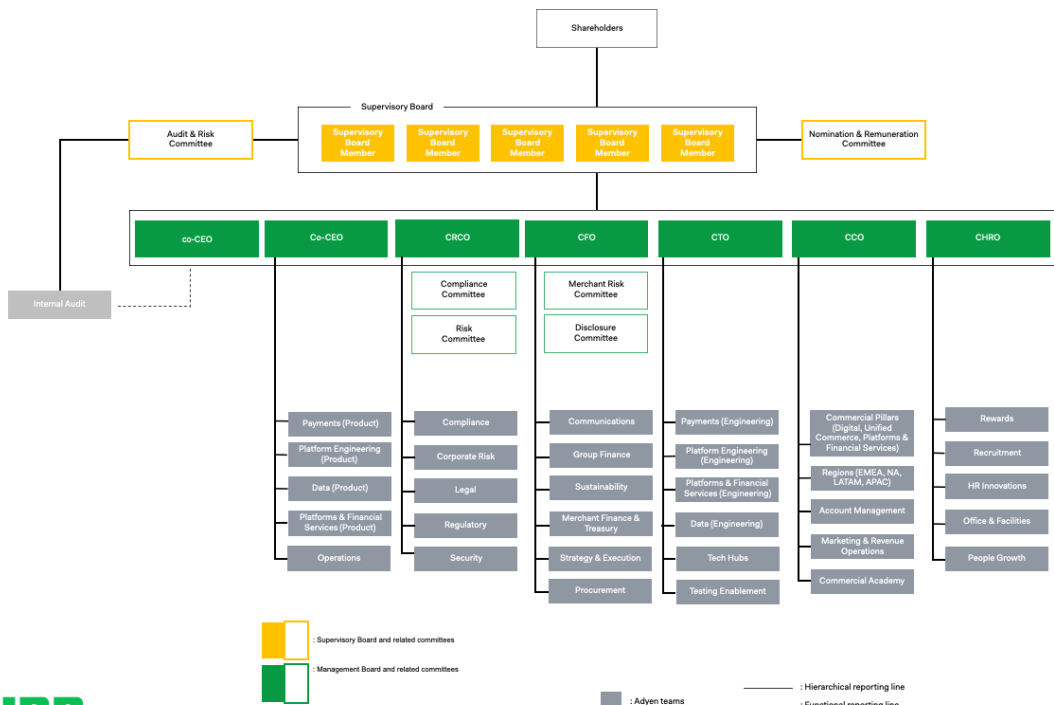

Figure 1
Adyen's organizational structure (2023)

¹¹ Art. 435(2) CRR.

Board composition and directorships

The composition of the Management Board and the Supervisory Board is as such that it ensures a degree of diversity appropriate to the Company with regards to the expertise, experience, competencies, other personal qualities, sex or gender identity, age, nationality and cultural or other background.

The members have a diverse set of knowledge, skills, capabilities and expertise, in line with the required profile as included in the Management Board and Supervisory Board By-Laws. The Boards value and promote diversity, not only within the Management Board and Supervisory Board, but also in the Company as a whole.

Management Board

In performing their duties, the Managing Directors are required to be guided by the best interests of Adyen and the business connected thereto, taking into consideration the interests of Adyen's stakeholders. This is documented in Adyen's Conflict of Interest Policy.

Adyen's Management Board is composed of the following members:

Pieter van der Does is the Co-CEO of Adyen, with over 15 years experience in the payments industry. Pieter van der Does was CCO at Bibit before co-founding Adyen in 2006. Since then, Adyen has grown from a startup into a globally operating business, averaging double-digit annual growth since 2007. Pieter built Adyen to transform the payments landscape, and has since solved payment complexity for many of the world's leading businesses. He has earned a degree in Economics from the University of Amsterdam. Pieter is a member of the Supervisory Board of Écart.

Ingo Uytdehaage is the Co-CEO of Adyen. Ingo joined Adyen as the CFO. Before joining Adyen, he gained extensive experience in the field of finance at several large enterprises. Having earned two business degrees and held multiple managerial positions, Ingo plays an essential role in Adyen's continued growth. He has earned degrees in accounting and finance from Maastricht University and followed the CPA post-graduate program from the Vrije Universiteit in Amsterdam. Ingo is a member of the Non-Executive Board and Chair of the Audit and Risk Committee of Wise plc.

Roelant Prins is the CCO of Adyen. As the Chief Commercial Officer of Adyen, Roelant is responsible for all commercial activities and development. After starting his career as a consultant, he moved on to the online payments industry in early 2000. Throughout the years, Roelant has held various international management roles in sales and business development for companies providing payment solutions to international ecommerce businesses. He has earned a degree in Economics from Erasmus University Rotterdam. Roelant is a member of the Supervisory Board of Seenons B.V.

Mariëtte Swart is the CRCO of Adyen. Prior to this role, she was Adyen's General Counsel and Company Secretary. Before joining Adyen, Mariëtte worked at an international law firm where she gained vast experience in global financial services, helping companies with products in payments, debt and equity solutions, M&A and financial markets. She has earned a degree in Regulated Markets and Corporate Law from Utrecht University. Mariëtte is a member of the Supervisory Board of Fairfood.

Alexander Matthey is the CTO of Adyen. Prior to his role, he was VP Integrations and later EVP Technology in Adyen's Berlin office. Before joining Adyen, Alex was the CTO and Vice-President of Rocket Internet-backed GlossyBox where he gained experience in leading a fast-growing company. He has earned degrees in IT and History from Humboldt University of Berlin.

Brooke Nayden is the Chief Human Resources Officer (CHRO) of Adyen. Brooke has spent her career helping tech companies scale throughout high-growth phases, and brings a comprehensive understanding of the talent landscape to Adyen's Management Board. At Adyen, Brooke served as Global Head of HR as part of the Global Leadership Team, a role in which she successfully led the Company's expansion. Previously at Atlassian, she focused on Technical and Leadership Recruitment. Brooke holds a degree in History and Literature from Claremont McKenna College.

Ethan Tandowsky is the Chief Financial Officer at Adyen. Over the past decade, Ethan has helped several pre-IPO start-ups and publicly-listed companies optimize their finance and accounting functions while at EY. Ethan joined in 2017 and was most recently part of the Global Leadership Team as Head of Group Finance. Ethan holds a degree in Business Economics with a focus on Accounting from UC Santa Barbara. He is certified as a CPA by the California Board of Accountancy. Ethan is a member of the Board of Stichting Sub3.

Table 4

Composition of the Management Board at 31 December 2023

Changes to the Management Board composition in 2023

During the Annual General Meeting of Shareholders on May 11, 2023, Brooke Nayden's proposed appointment as Chief Human Resources Officer (CHRO) was approved, as well as Ethan Tandowsky's proposed appointment as Chief Financial Officer (CFO). Further, in this meeting, Ingo Uytdehaage was reappointed in the position of Co-Chief Executive Officer (Co-CEO) for a four-year term, and Mariëtte Swart was reappointed as Chief Risk and Compliance Officer (CRCO) for a four-year term. Kamran Zaki stepped down as Chief Operating Officer on May 11, 2023. As a result, the Company's Product and Operations teams are now overseen by Ingo Uytdehaage (Co-CEO), and the Account Management team by Roelant Prins (CCO). Kamran continued to be involved in the Company's operations during the summer of 2023 to ensure a proper handover.

Supervisory Board

The Supervisory Board supervises the conduct and policies of the Management Board and the general course of affairs of Adyen and its business. The Supervisory Board also provides advice to the Management Board. In performing their duties, the members of the Supervisory Board are required to be guided by the interests of Adyen, which includes the interests of the business connected to it. These interests are driven by Adyen's focus on long-term value creation and the way in which this is implemented in Adyen's strategy and culture.

Throughout the year, four Supervisory Directors — Piero Overmars (Chair), Delfin Rueda, Pamela Joseph and Caoimhe Keogan— were considered to be independent from the Company. One Supervisory Board Director, Joep van Beurden, has acted as an advisor to Adyen in the years preceding his appointment in 2017, and is therefore considered not to be independent. The Supervisory Board is, as a body, independent.

Adyen's Supervisory Board is composed of the following members.

Piero Overmars serves as a member of the Management Board of Stichting Continuïteit PostNL and as a member of the Supervisory Board of Dura Vermeer Group N.V., Dutch Organic Trade B.V. and TLN Holdings B.V. Previously, he served as a member of the Management Board of Randstad Beheer B.V. and was Chairman of the Supervisory Boards of Nutreco and SNS Reaal, and member of the Supervisory Board of Amsterdam UMC. He also served as President of the Nyenrode Foundation, following an extensive career at ABN Amro that culminated in an executive position. Piero Overmars holds an MBA from Nyenrode Business University.

Delfin Rueda Arroyo is the Finance Managing Director at Squircle Capital and Venture Partner for Mundi Ventures. He also serves as a non-executive director at FlowTraders, Allfunds Bank, and Allfunds Group. Previously, Delfin held roles as CFO and Vice-Chair of the Executive Board at NN Group and ING Insurance. His career spans pivotal roles at Atradius, JP Morgan, and UBS. Delfin holds a master's in Economic Analysis from Complutense University of Madrid (Spain) and an MBA from the Wharton School, University of Pennsylvania (USA). Delfin is the Chair of the Audit and Risk Committee.

Joep van Beurden is CEO and member of the Executive Board of Kendrion N.V. and a member of the Advisory Board of PlantLab. Previously, he served as member of the Supervisory Board of Twente University of Technology (NL), and was CEO of CSR Plc. (UK) and NexWave Inc. (France), following a career at Royal Dutch Shell, McKinsey, Philips and Canesta Inc. Joep van Beurden holds a degree in Applied Physics from Twente University of Technology.

Pamela Joseph is CEO and member of the Management Board of Xplor Technologies, holds a position as Chair of the Board of Directors of TransUnion and is a non-executive member in the Board of Directors of Paychex. In addition to these positions, Pamela serves as Operating Partner at Advent International. Previously, she served U.S. Bank Corp. Payment Services as a Vice-Chairman, and prior to that Elavon as President and COO. She started her career at Wells Fargo Bank and VISA International. She holds a degree in Business Administration from the University of Illinois (USA).

Caoimhe Keogan serves as CPO (Chief People Officer) for Aveva Group. Previously, she served as Chief People Officer for Moneysupermarket Group plc, and as SVP People, Places & Community at SoundCloud. Prior to these roles, she was Senior HR Business Partner at Google. Her early career experience included management consulting roles with Deloitte and KPMG. Caoimhe Keogan holds a Master's degree in Occupational Psychology from Queen's University Belfast (UK).

Name	Year of birth	Nationality	Gender	Position	Initial appointment date	Current appointment date	Term ends
Piero Overmars	1964	NL	Male	Chair	January 2017	January 2021	January 2025
Delfin Rueda Arroyo	1964	SP	Male	Member	January 2017	January 2022	January 2026
Joep van Beurden	1960	NL	Male	Member	January 2017	January 2024	January 2026
Pamela Joseph	1959	US	Female	Member	May 2019	May 2023	May 2027
Caoimhe Keogan	1978	IE	Female	Member	February 2021	February 2021	February 2025

Table 5

Composition of the Supervisory Board at 31 December 2023

Board recruitment and diversity policy

The Annual General Meeting of Shareholders (General Meeting) appoints Managing Directors upon a nomination by the Supervisory Board in accordance with the Articles of Association. The Supervisory Board shall make one or more nominations to the General Meeting in case a Managing Director is to be appointed.

In the event that the Supervisory Board has made a nomination, the resolution of the General Meeting to appoint such nominee shall be adopted by an absolute majority of the votes cast. A resolution of the General Meeting to appoint a Managing Director other than in accordance with a nomination of the Supervisory Board, but in accordance with the agenda for such General Meeting, shall require a majority of two thirds of the votes cast representing more than half of the Company's issued share capital. However, the General Meeting may at its discretion appoint a Managing Director other than upon the nomination of the Supervisory Board, provided that a proposal to appoint such other person has been put on the agenda of the relevant General Meeting.

Adyen is a licensed credit institution, which means that any appointment of a Managing or Supervisory Director must be approved by DNB. In connection with its approval procedure, DNB will test the proposed new Managing or Supervisory Director on integrity (betrouwbaarheid) and suitability (geschiktheid).

The Supervisory Board aims for a balance in its composition with respect to age, experience and affinity with the nature and culture of the business of Adyen in all countries where it is active.

In December, 2023, the Supervisory Board approved an updated version of Adyen's Diversity, Equity and Inclusion policy (DEI Policy). The update includes diversity goals for the Management and Supervisory Board, as well as for the Global Leadership Team ('subtop'). The DEI Policy further aligns Adyen with the best practice requirements of the Dutch Corporate Governance Code, and confirms Adyen's commitments to a diverse and inclusive board and leadership.

Risk management committees

The Management Board has instituted committees to support with its risk management oversight: the Compliance Committee, the Disclosure Committee, the Merchant Risk Committee, and the Risk Committee. The Compliance Committee monitors Adyen's integrity and compliance risks, the Disclosure Committee is responsible for reviewing Adyen's financial information for compliance with legal and regulatory requirements prior to publication, the Merchant Risk Committee monitors the merchants' potential liability (MPL) risk and the Risk Committee monitors the overall risk profile.

The Risk Committee and the Compliance Committee report their observations, recommendations and deliberations on findings regarding compliance, risk management and internal control at least quarterly to the Management Board. The Risk Committee held four quarterly meetings to discuss these observations and deliberations during 2023. In addition, there were five monthly Risk Committee meetings to discuss and approve policies, plans, procedures, risk assessments and analyses and inform Risk Committee members on other information. The Management Board reviews reports from control assessments made on the operating effectiveness of systems and controls, acts on recommendations from the Risk and Compliance Committees and decides on corrective actions. The Management Board reports to the Audit and Risk Committee on the effectiveness of Adyen's risk management and internal control systems during the quarterly Audit and Risk Committee meetings.

Disclosures on Pillar I

Within the CRR and CRD framework, Pillar I lays down the minimum capital requirements for the main components of the major risk types that a traditional bank faces. The minimum regulatory capital requirement for Adyen's Pillar 1 consists of credit, market and operational risk as these are the relevant types of risk to which Adyen is exposed.

As at 31 December 2023, Adyen's total risk exposure amount is EUR 4,673 million. This results in a Pillar I capital requirement of EUR 373.8 million. When including the capital conservation buffer and countercyclical capital buffer, the Pillar 1 capital requirement equals EUR 532.8 million. Adyen's CET1 capital at year-end totals to EUR 2,609 million (2022: EUR 1,972 million). The increase in total own funds in 2023 mainly relates to the addition of consolidated net profits (full year 2022 and H1 2023). Upon formal confirmation, Adyen's H2 2023 net profit (EUR 416.1 million) may be included in its CET1 calculation. At that point, Adyen's CET1 capital becomes EUR 3,026 million.

Adyen is also subject to leverage and liquidity requirements as well as reporting requirements on asset encumbrance. The following section provides more detail on Adyen's requirements as laid down in Pillar I.

Capital

For regulatory purposes, capital¹² is defined as own funds, which can be divided in Common Equity Tier 1 (CET1), Additional Tier 1 and Tier 2. Adyen only holds Common Equity Tier 1 capital.

Common Equity Tier 1 capital comprises IFRS equity, with the inclusion of prescribed prudential filters and deductions. Table 6 provides a reconciliation of Adyen's own funds with Adyen's capital according to the IFRS definition.¹³ Annex EU CC1, describes the main features of this Common Equity Tier 1 capital.

(in EUR 000's)	CET1 capital as at December 31, 2023	
IFRS equity	3,150,867	
Of which: share premium		390,043
Of which: paid up capital		310
Of which: retained earnings		2,601,282
Of which: other reserves		159,232
Net profit not included in CET1 capital (H2 2022 not yet eligible)	(416,149)	
Adjustments due to prudential filters and deductions	(125,333)	
Intangible assets		(8,757)
DTA that rely on future profitability and do not arise from temporary differences		(90,985)
Warrant reserve		(25,575)
Prudent valuation ¹⁴		(16)
Total Common Equity Tier 1 Capital	2,609,385	

Table 6

EU CC2 - Reconciliation between IFRS equity and own funds (in EUR '000)

Prudential filters and deductions

Prudential filters and deductions remove or reduce certain elements from Adyen's own funds that are considered not to be eligible to absorb losses. The amounts related to these prudential filters and deductions are shown in table 6.

¹² Art. 437 CRR.

¹³ Annex EU CCA contains the relevant rows of the 'Own funds disclosure template' as laid down in ITS (EU) 1423/2013.

¹⁴ No restrictions ex. Art. 437(e) CRR were applied to the calculation of own funds.

Prudential filters

Adyen applies an additional value adjustment due to the requirements for prudent valuation as a prudential filter to its Common Equity Tier 1 capital. Institutions are required to calculate an additional value adjustment in order to adjust the fair value to a prudent value for all assets measured at fair value.¹⁵ The additional value adjustment must be deducted from Common Equity Tier 1 capital. Adyen has two financial instruments on the balance sheet that are measured at fair value, and subject to this additional value adjustment, which are VISA shares and a derivative financial liability from a merchant contract.

Deductions

Adyen also applies the following deductions to its Common Equity Tier 1 capital:

- Intangible assets other than goodwill
- Deferred tax assets that rely on future profitability and do not arise from temporary differences
- Warrant reserve
- Net profit not included in CET1 Capital (not yet eligible profit)

As of December 31, 2023, Adyen's total Common Equity Tier 1 Capital amounted to EUR 2,609 million.

Capital requirements

Adyen applies the standardized approaches to determine its regulatory minimum capital for credit and market risk and applies the Basic Indicator Approach for operational risk. Resulting from Adyen's business model, regulatory capital requirements for operational risk are most substantial.

Credit risk

Credit risk arises when a counterparty of Adyen cannot settle the full value of an obligation — when it becomes due, or thereafter. In addition, credit risk also has a concentration dimension with the risk of losses stemming from on- and off-balance sheet positions related to concentrations in exposures to a single counterparty or a group of connected counterparties. Adyen is exposed to credit risk primarily through receivables from financial institutions regarding settled payment transactions, through cash held at partner banks as well as through pre-financing services to merchants. The introduction of financial products has created a new, but limited, credit risk exposure in 2023. Adyen has no derivatives or securities financing transactions, nor positions in securitization.

Adyen is careful in selecting good counterparties and actively monitors the resulting exposure. When it comes to partner banks - whose services are necessary to provide payment services in certain circumstances - Adyen seeks to work with at least two different partner banks. Where possible, Adyen ensures that one of these providers is the central bank of the respective region.

At 31 December 2023, Adyen's total credit exposures amounted to EUR 9,560 million, resulting in total risk-weighted exposures of EUR 1,495 million and an own funds requirement in pillar 1 of EUR 119.6 million. The majority of Adyen's exposures have a short-term duration, with residual maturities of days. Furthermore, Adyen is aware of the concentration of its exposures, most notably on partner banks, which is reflected in its Pillar II add-on for credit concentration risk.

Annex EU CR4 provides an overview of Adyen's credit risk exposures, showing both the on- and off-balance sheet exposures as per 31 December 2023 the total amount of risk-weighted exposures and the RWA density of each asset class. Additionally, Annex EU CR5 discloses the distribution of each asset class exposure across risk-weights.

Credit risk mitigation

Credit risk mitigation techniques can be used to reduce the credit risk associated with exposures. Overall, Adyen performs on-balance sheet netting when it has a legal right to off-set and the intention to settle, in line with IFRS.

As a credit risk mitigation technique, Adyen employs off-balance sheet netting on one occasion. This regards an enforceable master netting arrangement with one of its foreign counterparties that allows offsetting in the event of default, collateralized by a debt security issued by a central government that has a credit assessment of an external credit rating agency¹⁶. The collateral is valued at market value and risk weighted at 10% as an exposure to central

¹⁵ Art. 34 and 105 CRR.

¹⁶ Art. 453 CRR.

governments. As of year-end 2023, total collateral value was EUR 15.1 million, which covered the full value of the exposure to this counterparty. Annex EU CR3 discloses Adyen's use of credit risk mitigation techniques.

Credit risk quality and adjustments

Adyen applies the following definitions regarding the credit quality of its exposures¹⁷.

- Past due: when an exposure is due for more than 1 day; and
- Non-performing, credit impaired or defaulted: when an exposure is past due more than 90 days or the counterparty is considered unlikely to pay, in line with the definition of default of CRR Art. 178.

Adyen assesses the expected credit loss associated with its debt instruments carried at amortized cost on a forward-looking basis. The impairment methodology applied depends on whether there has been a significant increase in credit risk. For trade receivables and contract assets, Adyen applies the simplified approach, which requires expected lifetime losses to be recognized from initial recognition of the assets.¹⁸

At reference date, Adyen recognized EUR 57.7 million of non-performing exposures¹⁹, for which it has provisioned EUR 9.6 million as a general credit risk adjustment.

Annex EU CR1, EU CR1-A, EU CQ3, EU CQ4 and EU CQ5 disclose further information on exposure amounts that are non-performing, in default and subject to impairment. Most of these exposures are due from corporates and represent invoices for payment services that were not collected via transaction flows (i.e. trade receivables).

Use of External Credit Assessment Institutions

Adyen applies ratings from External Credit Assessment Institutions²⁰ (ECAIs) to determine the risk weight of an exposure. With respect to its rated exposures, Adyen by default uses Moody's whenever it has a rating available. Only in the case that no rating of Moody's is available, Adyen uses a rating provided by Fitch or Standard and Poor's, whichever is the lowest. Adyen therefore has a consistent rating selection approach. In order to determine the risk weight of an exposure, a rating is converted into the corresponding credit quality step based on the standard association as published by the EBA.²¹ Adyen uses ECAIs in order to determine the risk-weight of exposures belonging to the following three exposure classes:

- Central governments or central banks;
- Institutions; and
- Corporates.

Exposures to unrated counterparties are by default 100% risk weighted, in line with CRR Art. 122(2). Unrated institutions are risk weighted in accordance with CRR Art. 121. Adyen applies the standard association published by the EBA for connecting the ratings to the credit quality steps as set out in CRR, which is summarized in table 7 below.

Credit quality step	Moody's assessments	Sovereigns – risk weight	Institutions – risk weight	Corporates - risk weight
1	Aaa to Aa3	0%	20%	20%
2	A1 to A3	20%	20%	50%
3	Baa1 to Baa3	50%	20%	100%
4	Ba1 to Ba3	100%	50%	100%
5	B1 to B3	100%	50%	150%
6	Caa1 and below	150%	150%	150%

Table 7

Mapping of credit ratings to the applicable risk weights, in line with CRR II

¹⁷ Art. 442(a) CRR.

¹⁸ Art. 442(b) CRR.

¹⁹ As of 1 January, 2021, the new guidelines on the definition of default (EBA/GL/2016/07) entered into force, which specify thresholds for institutions to recognize defaulted exposures. As a result, Adyen's defaulted exposures are now recognized under the credit risk framework. Thus, the recognition of defaulted exposures is purely due to a regulatory change rather than a change to Adyen's non-performing exposures.

²⁰ Art. 444 CRR.

²¹ ITS (EU) 2018/634.

Equities in the banking book

Adyen's exposure to equities in the banking book arises from a holding of convertible preferred Visa shares. Adyen obtained these shares as the result of its previous holding in Visa Europe, which subsequently was acquired by Visa Inc., and resulted, amongst others, in Adyen being issued shares of Visa Inc. as consideration for the acquisition.

The remaining Visa shares are stated at fair value for EUR 14.8 million, which is based on the fair value of Visa Inc. Series C common stock, adjusted for lack of marketability, multiplied by an initial conversion rate of preferred stock into common stock. These shares have no stated maturity and carry the right to receive discretionary dividend payments. Due to a restriction on transfer, the remaining Visa shares cannot be freely traded. During 2023, no conversion of any of the Series C preferred stock took place. However, a partial conversion of the Series C preferred stock into Series A preferred stock happened in 2022, which was fully settled. The remaining Visa Inc. preferred shares carry the right to receive discretionary dividend payments presented as 'other income' in the financial statement of comprehensive income (2023: EUR 172 thousand; 2022: EUR 44 thousand).

Furthermore, the effect of the Visa shares on other financial results is a net gain of EUR 2.6 million (2022: net gain of EUR 2.0 million) relating to an exchange loss of EUR 652 thousand (2022: loss of EUR 2.2 million) and fair value gain of EUR 3.2 million (2022: loss of EUR 153 thousand).

As per 31 December 2023, the total exposure value of equities in the banking book amounted to EUR 14.8 million, resulting in an own funds requirement of EUR 1.2 million. Exposures relating to equities are perpetual.

Market risk

Market risk²² is the risk of losses from on- and off-balance sheet positions arising from movements in market prices (e.g. stock prices, interest rates or foreign exchange rates). Adyen does not hold trading book items and has no commodity positions. Adyen's exposure to foreign exchange risk results from its cash position held for conducting its international operations, and some longer-term non-cash balance sheet positions denominated in currencies other than EUR. Similarly, Adyen's interest rate risk is in the form of earnings sensitivity and driven by its cash and cash equivalents' position held for merchant payouts and as a liquidity buffer. Due to its Pillar II nature, more details on interest rate risk in the banking book are provided in the 'Disclosures on Pillar II' section. With respect to equity price risk, Adyen has no appetite to add new equity positions to its balance sheet next to the current VISA shares that have been described in the section 'Equities in the banking book'.

Adyen applies the standardized approach in order to calculate its own funds requirements for market risk. Adyen's total risk exposure amount for market risk under pillar 1 fully stems from foreign exchange risk and is EUR 549.5 million, resulting in an own funds requirement of EUR 44.0 million. Further details on Adyen's foreign exchange risk exposure are provided below and in Annex EU MR1.

Foreign exchange risk

A stronger or weaker euro (EUR) versus foreign currencies (primarily US Dollar or USD) impacts the translation of Adyen's net revenues generated in these foreign currencies into EUR. Similarly, such foreign exchange movements impact balance sheet positions denominated in currencies other than EUR (primarily in USD) including contract assets, deferred tax assets, shares, own funds as well as assets and liabilities of foreign subsidiaries. Additionally, in connection to providing its services in multiple currencies, Adyen generally sets its foreign exchange rates once per day. Thus, Adyen is also exposed to foreign exchange risk if it incorrectly sets its foreign exchange rates, or if there are fluctuations in foreign exchange rates between the rate fixing times. Adyen pays particular attention to the foreign exchange risk related to its international payment services for merchants. Adyen manages its foreign exchange risk on a continuous basis according to its risk appetite. Any foreign exchange exposure outside of the established risk appetite is actively hedged.

Operational risk

Adyen recognizes that operational risks are associated with achieving its business objectives. Operational risk concerns the risk of losses resulting from inadequate or failed internal processes, people and systems or from external events. Adyen has therefore implemented an internal control framework that is designed to manage the risks effectively and efficiently and to provide reasonable assurance that objectives can be met. The operational risks that are most material to Adyen are outlined below.

²² Art. 445 CRR.

Merchants' potential liability for shopper chargebacks

When shoppers claim that a merchant has not performed, the issuing banks can file chargebacks. Adyen seeks to offset such chargebacks with the payouts to the merchants, but may not be able to succeed in full. While Adyen has implemented risk mitigation, including withholding funds from the payouts to its merchants, based on assumptions and estimates that Adyen believes are reasonable to cover such eventualities, the measures, including the withheld funds, may not be sufficient to cover for the complete chargeback amounts.

Availability of platform, products and services

Adyen's systems and those of its third-party service providers, including data center facilities and communication networks, have experienced service interruptions in the past and may experience significant service interruptions in the future. Frequent or persistent interruptions in Adyen's services could cause current or potential merchants to believe that its systems are unreliable, leading them to switch to a competitor or to avoid Adyen's products and services. Moreover, to the extent that any system failure or similar event results in damages to Adyen's merchants or their business partners, these merchants or partners could seek significant compensation or contractual penalties from Adyen for their losses, which, even if unsuccessful, could likely be time-consuming and costly for Adyen to address. Furthermore, frequent or persistent interruptions could lead to regulatory scrutiny, significant fines and penalties, and/or mandatory and costly changes to its business practices, or could ultimately cause Adyen to lose its regulatory licenses.

Information security

Adyen and its merchants, partners and others who use its services, obtain and process a large amount of sensitive data. Adyen's and its partners' IT systems may be vulnerable to physical and electronic breaches, computer viruses and other attacks by cyber-criminals, internet fraudsters, employees, or others, which could lead to, amongst other things, a leakage of merchants' data, damage related to incursions, destruction of documents, inability or delays in processing transactions and unauthorized transactions. Any real or perceived privacy breaches or improper use of, disclosure of, or access to such data could harm Adyen's reputation as a trusted brand in the handling and protection of this data. Although Adyen carries cyber liability insurance that Adyen believes to be reasonable given the company risk profile, it could be possible that the insurance coverage is insufficient to account for all losses forthcoming an incident.

Data privacy

Adyen is subject to complex and evolving Dutch, European and other jurisdiction's laws, rules, regulations, orders and directives (referred to as "privacy laws") relating to the collection, use, retention, security, processing and transfer of personally identifiable information about its merchants, their shoppers, third parties and others and their transactions in the countries where Adyen operates. Much of the personal data that Adyen processes, especially financial information, is regulated by multiple privacy laws and, in some cases, the privacy laws of multiple jurisdictions. In many cases, these laws apply not only to third-party transactions, but also to transfers of information between or among Adyen and its subsidiaries. Any failure, or perceived failure, by Adyen to comply with its privacy policies or with any applicable privacy laws in one or more jurisdictions could result in proceedings or actions against Adyen by governmental entities or others, including class action privacy litigation in certain jurisdictions, significant fines, penalties, judgments and resulting reputational damage.

Adyen is committed to securing and safeguarding (personal and other) data and has taken actions as well as organizational and technical measures to realize this. In addition, Adyen defines data ethics risk as the risk that Adyen does not meet its internal, external and/or regulatory expectations regarding ethical usage of data and model fairness, and the negative commercial, reputational, and regulatory effects this entails.

Entrepreneurial culture

Adyen's entrepreneurial culture has been one of the primary drivers of its historical growth. As Adyen grows, it may not be able to maintain its entrepreneurial company culture, which fosters innovation and talent. The hybrid working environment adds to the challenge of maintaining, transferring and fostering the right company culture. If Adyen does not successfully manage its growth, and is not able to differentiate its business from those of its competitors, drive value for and retain merchants, or effectively align its resources with its goals and objectives, Adyen may not be able to compete effectively against its competitors, leading to declining growth and revenues.

Talent

Adyen's future performance depends substantially on the continued services of key talent and its ability to attract, retain, and motivate such talent. The loss of the services of any of Adyen's key talent or Adyen's inability to attract highly qualified key talent may adversely affect its operations. Withstanding the challenges of local and global labor markets, Adyen aims to tailor its personnel needs to the medium- to long-term growth trajectory of the company.

Integrity

Integrity risk is the risk of inappropriate behavior of management and employees or third parties (merchants, suppliers, advisers) posing a current or future threat to Adyen and/or the proper functioning of the financial system, that can be attributed to Adyen or in which Adyen acts imputable. Such inappropriate behavior could refer to violations of law, regulations, internal policies, and market expectations of ethical business conduct. If Adyen (or a third party it does business with) fails to comply with laws and regulations, or market expectations of ethical business conduct, supervisory authorities may initiate legal and regulatory proceedings against Adyen.

Adyen has policies and procedures that it believes are sufficient to comply with the relevant anti-money laundering, anti-corruption and sanctions rules and regulations. Inability to prevent integrity risks from materializing can have severe consequences, including litigation, sanctions, administrative measures, fines, criminal penalties and reputational consequences.

Tax and tax reporting

Social tolerance for tax avoidance is decreasing and international developments have led to the introduction of stricter regulations around tax avoidance. The determination of Adyen's worldwide position for income taxes, value-added taxes and other tax liabilities requires clear processes and controls by which Adyen aims to automate as much as possible as to reduce the amount of manual intervention. Adyen's determination of its tax liability is always subject to audit and review by applicable domestic and foreign tax authorities. Any adverse outcome of any such audit or review could have a negative effect on Adyen's business and the ultimate tax outcome may differ from the amounts recorded in its financial statements.

Basic indicator approach

Adyen applies the basic indicator approach in order to calculate its own funds requirements for operational risk under Pillar I. Under the basic indicator approach, the own funds requirement for operational risk is equal to 15% of the average over three years of the relevant indicator. The relevant indicator refers to the sum of several elements within the profit and loss statement of the institution.

Adyen's total risk exposure amount for operational risk is EUR 2,628 million resulting in an own funds requirement of EUR 210.2 million per year-end 2023. Annex EU OR1 discloses on the calculation of the pillar 1 own funds requirement for operational risk.

Combined buffer requirements

On top of its capital requirement for credit, market and operational risk, Adyen is subject to macro-prudential capital buffer requirements. These buffer requirements aim to mitigate economic cycles by acting as shock absorbers in times of stress. For Adyen, only the capital conservation buffer and the countercyclical capital buffer apply. The combination of all capital buffers constitutes the combined buffer requirement.

Capital conservation buffer

The capital conservation buffer requires banks to hold up to 2.5% of a bank's total exposures in CET1 capital to avoid breaches of minimum capital requirements during periods of stress when losses are incurred. The capital conservation buffer rate can be set by the national competent authority, as set out in CRD V. In Adyen's case the rate is set by DNB and currently amounts to a 2.5% buffer requirement. At 31 December 2023, Adyen's capital conservation buffer requirement was EUR 116.8 million.

Countercyclical capital buffer

Adyen is subject to an institution specific countercyclical buffer²³ requirement. The geographical distribution of Adyen's credit exposures relevant for the calculation of the countercyclical capital buffer is shown in Annex EU CCyB1. The institution-specific countercyclical capital buffer rate for Adyen is 0.9%, which amounts to an institution-specific countercyclical capital buffer requirement of EUR 42.2 million, which is presented in Annex EU CCyB2.

²³ Art. 440 CRR.

Leverage

Leverage means the relative size of an institution's assets and off-balance sheet obligations as compared to the institution's own funds.

Leverage ratio

The leverage ratio²⁴ is a monitoring method used to assess the risk of excessive leverage within institutions. It is defined as Tier 1 capital divided by a non-risk-based measure of the on- and off-balance sheet asset positions. By restricting the build-up of leverage, the leverage ratio aims to avoid destabilizing deleveraging processes that can damage the broader financial system and the economy.

As per 31 December 2023, Adyen has a leverage ratio of 27.5% (2022: 26.3%) which is above the regulatory requirement of 3%. Annex EU LR1, EU LR2 and EU LR3 provide a break-down of Adyen's leverage ratio and the CRR leverage ratio exposures by asset class.

Adyen does not operate a business model that centers around balance sheet transformation and as such the processes used to manage the risk of excessive leverage focus primarily on monitoring of the ratio itself and inclusion of the ratio in scenario modeling.

Asset Encumbrance

An asset is encumbered if it has been pledged or if it is subject to any form of arrangement to secure, collateralize or credit enhance any transaction from which it cannot be freely withdrawn.

Adyen has a limited amount of encumbered assets in the shape of restricted cash which is therefore not available for general use by the company. Of the cash held at banks, other than central banks, EUR 88.9 million is restricted. The restricted cash mainly relates to deposits required under the US Federal Foreign Branch license, Brazilian acquiring license, as well as deposits held as guarantee for leased offices. Furthermore, Adyen has EUR 4.3 million other encumbered assets which represent other deposits, including lease deposits of other regions. Adyen's total encumbered assets amounts to EUR 93.1 million²⁵. Annexes EU AE1, EU AE2 and EU AE3 provide further detail on the encumbered and unencumbered assets.

Liquidity and funding

Pillar I includes requirements with respect to short-term liquidity in the form of the Liquidity Coverage Ratio (LCR) and medium-term liquidity (funding risk) in the shape of the Net Stable Funding Ratio (NSFR)²⁶.

Liquidity Coverage Ratio

Adyen calculates its LCR in line with the relevant Delegated Act. Adyen takes aspects of currency convertibility and encumbrance into account. The LCR is calculated as High Quality Liquid Assets (HQLA) relative to the net liquidity outflows over 30 days. The Delegated Act prescribes that the LCR is to be higher than 100%. Furthermore, Adyen is subject to a Liquidity Survival Period requirement of more than 6 months.

Adyen's HQLA (liquidity buffer) consists of cash held at central banks. Net liquidity outflows are calculated as the net of cash inflows and outflows, with a 75% cap on inflows. The LCR of Adyen per 31 December 2023 is 1,341% (2022: 2,069%) with a survival horizon of 35 months (2022: 38 months), meaning that Adyen is fully compliant with the liquidity requirements set out in the LCR DA.

Annex EU LIQ1 provides more detail on the build-up of Adyen's LCR as well as presents quarterly averages of the balances in scope. Adyen's LCR is considerably well above external and internally set limits.

Net Stable Funding Ratio

CRR2 regulation has introduced a minimum Net Stable Funding Ratio (NSFR) of 100% that requires banks to maintain a stable funding profile in relation to their on and off balance sheet exposures.

²⁴ Art. 451 CRR.

²⁵ Art. 443 CRR.

²⁶ Art. 451a CRR.

The NSFR looks at medium-term liquidity risk (funding risk) and assesses the ability of Adyen to fund its upcoming activities by applying quality weights reflecting liquidity characteristics to sources of funding as well as to exposures that require funding. The weights applied are set out in CRR II Art. 428 and differ per type of Available Stable Funding (ASF) and Required Stable Funding (RSF).

Adyen's NSFR per 31 December 2023 is 292.6% (2022: 273.7%). The improvement of the ratio over 2023 is attributable to an increase in Adyen's CET1 capital (ASF). Annex EU LIQ2 further discloses on the build-up of Adyen's NSFR for the reporting period.

Liquidity risk management

Liquidity risk is the risk that Adyen cannot meet its intraday, short- and/or medium-term payment and collateral obligations without affecting daily operations. Given its payments-centered business model Adyen is mainly exposed to intraday and short-term liquidity risks.

Adyen operates a business model in which it has deployed structural measures, strategies and processes to mitigate liquidity risk. In general, Adyen only has a payment obligation towards its merchants once the funds from the schemes and payment methods are settled to Adyen. In situations of exception to this rule, additional liquidity risk mitigating measures are in place. Adyen is self-funding and holds sufficient own cash reserves to meet its own short- and longer-term liquidity needs.

Adyen's short-term liquidity management is set up to ensure funds are available in the right legal entity, bank account, country, currency, and at the right moment in time to fulfil Adyen's contractual payment obligation to its merchants. This is established by managing cash and FX positions on a daily basis with dedicated teams. Adyen does not apply synthetic hedging to manage its liquidity or connected risks.

Adyen operates a single, global payments platform which allows for centralized liquidity risk management supported by global policies. Liquidity needs at individual legal entities are limited, but if these arise, these are addressed by the central Treasury team.

As a technology company that relies heavily on availability and continuance of services, liquidity aspects are part of continuity scenario exercises and resilience plans. Adyen plans for both operational as well as financial origins of stress and monitors the relevant liquidity metrics across the stress horizon.

Disclosures on Pillar II

Pillar II sets out mandatory processes for institutions and supervisors to fulfill capital adequacy and liquidity adequacy requirements. Adyen combines the assessment of these requirements within its ICLAAP report. This chapter describes Adyen's ICLAAP and specifically addresses interest rate risk in the banking book.

Internal capital and liquidity adequacy assessment process

Adyen has designed and implemented as well as maintains and monitors internal risk management and control systems to identify and manage risks associated with its strategy and activities. Additionally, Adyen uses stress testing to understand its financial resilience and to learn from its sensitivity to stress events. The stress scenarios that Adyen defines are based on exceptional but plausible events with an adequate degree of severity. Threats and trends relevant to the management board are included. Stress testing is performed in accordance with EBA guidelines on stress testing. The results from stress tests are used as input for fine-tuning Adyen's risk appetite, risk capacity and risk limits as a feedback mechanism.

Assessing the adequacy of capital and liquidity is carried out on a continuous basis, but often for specific areas of interest. At a minimum, Adyen conducts an integral adequacy assessment once a year and reports on this to DNB via its Internal Capital and Liquidity Adequacy Assessment Process (ICLAAP²⁷). Based on the 2023 ICLAAP process, the results showed Adyen has a high financial shock absorption capacity and adequate levels of capital and liquidity.

Following the proportionality brought forth in the revised Guidelines on common procedures and methodologies for the supervisory review and evaluation process (SREP), Adyen has qualified for a bi-annual SREP cycle. As such, Adyen's own funds requirements are established every two years, though subject to a yearly capital adequacy assessment which is shared with the Dutch Central Bank.

Interest rate risk in the banking book

Interest rate risk in the banking book²⁸ is defined as the risk that changes in interest rates lead to an adverse impact on Adyen's income or economic value.

Adyen's business model is primarily fee-based, while interest income does not constitute a key revenue component of its client-facing product offering. Despite the fee-based business model, Adyen's balance sheet has various characteristics that are relevant from an interest rate risk perspective:

- Adyen's assets mainly consist of interest-bearing cash and cash equivalents at central banks and partner bank accounts;
- Adyen is fully equity financed - i.e. its liabilities are interest rate-insensitive; and
- Adyen's balance sheet is of distinct short-term nature.

As a result, changes in interest rates only translate into the price of assets but not in that of liabilities. This profile creates an inherent net interest income sensitivity to interest rate changes. Since the cash is held in relation to merchant payables and as a liquidity buffer, the related interest rate risk is considered innate to Adyen's business model and accepted as part of doing business. The net interest income sensitivity is only expected to turn into actual losses in the event of negative interest rate levels in material currencies.

In line with the guidelines on the management of interest rate risk arising from non-trading book activities (EBA-GL 2018/02), Adyen quantifies the impact of interest rate movements in its earnings and economic value for each significant currency. Please see Annex EU IRRBB1 for an overview of Adyen's quantitative interest rate risks exposure aggregated over all significant currencies.

The earnings sensitivity is calculated as the interest income sensitivity of interest rate-sensitive positions to a ramped +200bps and -200bps shock, respectively, over the horizon of 1 year based on a constant balance sheet assumption.

²⁷ Art. 438(a) CRR.

²⁸ Art. 448 CRR.

The sensitivity is positive in an upward shock scenario and negative in a downward scenario. The sensitivity is primarily driven by Adyen's position in cash and cash equivalents as elaborated above.

The economic value sensitivity is calculated as the net present value sensitivity of interest rate-sensitive positions to instantaneous +200bps and -200bps shocks, respectively. The calculation bases upon a run-off balance sheet assumption - i.e. all positions at reporting date are assumed to amortize contractually. The calculation includes, both, notional cash flows as well as interest rate cash flows.

The value sensitivity is negligible in, both, an upward and a downward shock scenario due to the fact that Adyen's balance sheet is very short-dated. The relatively minor exposure is mainly driven by longer-dated financial lease liabilities.

Remuneration

Adyen's remuneration policy

The primary objective of Adyen's global remuneration policies is to recruit and retain the best global talent by offering competitive payment structures that account for our strategy of focusing on our customers' growth, changing the payments landscape, and having fun while doing so.

Adyen's remuneration policies and practices consistently promote sound and effective risk management. They are always aligned with our strategy and the Adyen Formula to create long-term value for our company and our customers. As such, we do not provide any incentives that exclusively benefit individual staff members or encourage improper risk-taking.

The remuneration policy is published on Adyen's website. There have been no deviations from the policy or the procedure for its implementation in the financial year 2023²⁹.

Remuneration principles

Adyen is committed to ensure equal pay between women and men. We value all perspectives equally and do not weigh one greater than another. At its core, this means: same role, same pay. Our annual equal pay audit is designed to safeguard and uphold this standard. Our annual equal pay audit is designed to safeguard same pay and uphold this standard.

The size of an individual remuneration package is based on the scope of responsibilities, the employee's experience and performance, and the local market circumstances, which varies depending on country. Remuneration may consist of a base salary, share-related remuneration, pension entitlements and other emoluments. Certain employees' remuneration may also include variable pay.

Adyen has the right pay mix in place to mitigate short-term orientation and contribute to the long-term performance of the company. This is specifically achieved by awarding staff members, including the Management Board, with (long-term) share-related remuneration. The purpose of the share-based payments is to put staff members in a financial ownership-like position where shares are concerned and for them to obtain an economic interest in the pursuit of Adyen's long-term objectives such as sustainable growth, development, profitability, and financial success of Adyen.

Variable remuneration

Adyen observes the laws and regulations applicable to the company, which includes the remuneration regulations as provided in the Act on Remuneration policy Financial Undertakings (Wet beloningsbeleid financiële ondernemingen) and the EBA Guidelines on Sound Remuneration Policies (EBA Guidelines) (the Remuneration Regulations). Adyen's remuneration policy is in line with the Remuneration Regulations.

Employees may be rewarded with variable remuneration. Variable remuneration, if awarded, will at all times not exceed the fixed to variable remuneration ratios as provided in the Remuneration Regulations. In accordance with the Remuneration Regulations, variable remuneration will be subject to hold back and claw back instruments. As no variable remuneration has been awarded to the members of the Management Board or the Supervisory Board in the financial year 2023, no variable remuneration has been adjusted or clawed back in accordance with these instruments.

The total global company-wide amount of variable remuneration awarded over 2023 was EUR 37.3 million (2022: EUR 22.2 million) compared to total staff expenses of EUR 594.0 million (2022: EUR 380.6 million).

²⁹ Art. 450 CRR.

Identified staff

In 2023 there were 52 employees (2022: 33) identified as "Identified Staff", being staff that is considered to have a material impact on the risk profile of Adyen. Annex EU REM 1 provides an overview of remuneration awarded to identified staff over 2023, split into fixed and variable remuneration.

In 2023, there were 8 employees (2022: 7) to whom total annual remuneration (including employer pension contributions and any severance payments made) of EUR 1,000,000 or more was awarded.

Nomination and Remuneration Committee

The Nomination and Remuneration Committee consist of three Supervisory Board members as determined by the Supervisory Board. The current Management - and Supervisory board remuneration policies, effective as per January 1, 2024 were adopted at the Annual General Meeting (AGM) of shareholders on May 11, 2023.

Remuneration for the Management Board

The remuneration policy that applies to the Management Board members is in line with the remuneration policy that applies to all staff. As such, the remuneration policy does not contain incentives that exclusively benefit Management Board members themselves.

As of 2018 and in line with (i) the Act on Remuneration Policies in Financial Enterprises (Wet beloningsbeleid financiële ondernemingen), and (ii) the Guidelines on Remuneration Policies and Practices as formally adopted on 10 December 2010 by the Committee of European Banking Supervisors, Adyen does not award variable remuneration to the Management Board members.

The remuneration of the Management Board members is determined by the Supervisory Board with due observance of the remuneration policy as adopted by the Annual General Meeting.

The Management Board members do provide the Nomination and Remuneration Committee with their views with regard to the amount and structure of their own remuneration. In 2023, the base salaries of our Management Board members were increased by 15%, with the exception being one of our co-CEO's (8% increase).

Compared to AEX companies, the Management Board's remuneration is below the median of the benchmark. To attract future Management Board members, the remuneration package for new Management Board members may be adjusted to the market following the new Management Board Remuneration Policy's group.

On an annual basis we determine the internal ratio of the Management Board members' remuneration versus all other Adyen staff. For this ratio Adyen included all remuneration components of the CEO compared to the average total remuneration of all Adyen employees worldwide. For the CEO a ratio of [7:1] applies (2022: [7:1]). For the other Management Board members a ratio of [7:1] applies (2022: [7:1]).

This calculation methodology is in accordance with the guidance as provided in the Dutch Corporate Governance Code. Our pay ratio is observed to be amongst the lowest compared with other AEX companies and reflects our vision of not treating the Management Board materially different than the other staff.

ESG risks

On January 24th, 2022, the European Banking Association (EBA) published the Implementing Technical Standard (ITS) on Pillar 3 disclosures for environmental, social and governance (ESG) risks³⁰. The standard is meant to promote market discipline, allowing stakeholders to assess a bank's ESG risks and strategy. Disclosure should also provide insight into the undertaking's asset exposure to climate change risks, both in the form of physical and transitional risks, including quantitative efforts made by the undertaking to mitigate and adapt to the adverse effect of climate change.

The EBA ITSs require the disclosure to consist of three qualitative sections to define environmental, social and governance risks, plus a total of ten quantitative tables (the "Tables"), four of which on climate change transition risk, one on climate change physical risk, plus three with quantitative data on the actions that credit institutions are implementing in order to mitigate risks linked to climate change, including information on taxonomy-alignment actions (GAR and BTAR) and any other mitigation actions.

Adyen will therefore start with providing a qualitative information section consisting of business strategy and process, governance, and risk management for each of the three ESG risk dimensions. Next, the quantitative information section will follow with a more in-depth assessment of Adyen's asset exposure to ESG risks. This disclosure includes the assessments of available and applicable templates³¹, except for Template 2 that is only required starting from June 2024.

Timelines and proportionality

The EBA Guidelines allow for a phase-in period until June 2024 for more complex risk measurement methodologies and data points, such as Scope 3 emissions and alignment metrics, i.e. the disclosures on the Green Asset Ratio (GAR) and the Banking Taxonomy Alignment Ratio (BTAR). The guidelines also make considerations around proportionality. The EBA acknowledges the challenges faced by institutions when preparing ESG-related disclosures and have made some proposals to support institutions in preparing for these disclosures. Mainly, a proportionate approach is proposed for the disclosure of information on exposures towards physical risk, which is to be provided 'on a best effort basis' with the possibility for institutions to explain in the case where it is not feasible to collect the information on a bilateral basis or to estimate it without unduly overburdening institutions or their counterparties. As such, Adyen has now disclosed the applicable templates 'on a best effort basis' and plans to continue further developing its methodology and enhancing data availability.

Qualitative information

At Adyen, ESG matters are approached in conjunction. As such, the management and governance of ESG matters does not differ significantly across the three topics. The same applies to the process of identifying, measuring and monitoring activities and exposures sensitive to ESG risks.

ESG Governance

The Management Board as a whole sets the direction and execution of the company's ESG strategy as embedded throughout the company's strategy. Specific topics are distributed amongst the members of the Management Board. With respect to ESG, the CFO oversees environmental sustainability and social initiatives, the CRCO oversees business conduct governance matters, and the CHRO oversees matters relating to Adyen's workforce and social matters. Through this structured approach, the Management Board directs specific teams in the first- and second-line risk management functions. Second-line risk management teams integrate ESG risks into the Integral Risk Management Framework and related policies and procedures are developed in conjunction with first-line teams, covering relevant transmission channels in environmental and social risk.

The company's overall ESG strategy and activities are discussed at Supervisory Board level at least on an annual basis. In 2023, ESG topics were discussed in three Supervisory Board meetings — during the materiality assessment process, the ongoing preparations for the 2023 Annual Report, and as part of the annual strategy session.

³⁰ EBA website (<https://www.eba.europa.eu/eba-publishes-binding-standards-pillar-3-disclosures-esg-risks>)

³¹ The remaining templates will be disclosed in subsequent publication rounds

In 2023, Adyen continued iterating and expanding on the structure of the ESG Working Group. This is a cross-functional group that includes members of the reporting, corporate risk, legal, communications, and sustainability teams. The objective of the Working Group is to coordinate ESG and sustainability-related projects and to establish a unified approach to reporting on Adyen's ESG matters. The ESG Working Group holds sessions with identified subject-matter experts on material ESG topics to track progress and drive success in their respective areas. The Working Group reports its activities to Adyen's CFO, and updates the Management Board on ESG matters on a quarterly basis. The third line internal audit function provides independent assurance on the effectiveness of the ESG program including risk management, control activities, by performing audits. The Head of Internal Audit reports directly to the Chair of the Audit and Risk Committee.

There are also numerous employee grass-root initiatives on ESG topics within the company. Adyen actively empowers its employees to use time and resources to make an impact. Within the Adyen culture, employees are enabled to act autonomously and without bureaucratic limitations to enable speed. However, coordination between Management Board, ESG Working Group and other employees takes place continuously and through specific teams, committees or project-based initiatives. Examples include the Adyen Impact and Sustainability teams, Diversity, Equity and Inclusion ERGs, as well as our 'Seat at the table' quarterly meetings. Further, Adyen has established four strategic objectives, which Adyen aims to actively execute on up to and beyond 2030. These are:

1. DEI: Diversity and inclusion are a shared responsibility for which the global Adyen team is collectively accountable.
2. Community: We generate a positive impact in the communities where we operate.
3. Environment: Sustainability is a key decision-making factor in operating and growing our business.
4. Impact technology: We tap into our platform to drive environmental and social change.

In order to continue integrating short-, medium-, and long-term environmental and social factors and risks into the organizational structure, ESG risks are embedded throughout operational design, policies & procedures, and training of Adyen's employees. These procedures are updated frequently as part of the Adyen's risk and control cycle. Further, teams across the business set goals and objectives as part of the annual goals setting and key result cycle. These goals and objectives are used to drive short-, medium-, and long term strategy relative to each of the specific ESG areas. Employees are also expected to understand their role in creating an ethical and inclusive company culture as embedded in the Adyen Formula. To create an environment of ethical behavior both inside and outside of Adyen, everyone at Adyen knows that they share the responsibility to prevent any acts contrary to generally accepted social or business conduct standards, or those which could seriously damage confidence in Adyen or in the financial industry (e.g. breaches of applicable requirements, suspected wrongdoings).

Currently, Adyen's Management Board remuneration policy does not include variable remuneration for any specific topics, including ESG topics. The newly approved Supervisory Board and Management Board remuneration policies, which have been approved in the 2023 AGM and are effective per January 2024, include several non-financial performance criteria in accordance with Adyen's ambition to deliver long-term and sustainable value creation for all stakeholders. These are in line with Adyen's general principles of building an ethical and sustainable business and the Adyen Formula, as well as strategic, operational, risk- and compliance objectives. In addition, in 2023, Adyen amended its Articles of Association to such that its objectives describe to strive for sustainable long-term value creation over short-term profit optimization.

ESG materiality assessment

As prescribed by the Corporate Sustainability Reporting Directive (CSRD), Adyen is required to conduct a double materiality assessment which with the goal of identifying ESG-related Impacts, Risks, and/or Opportunities (IROs). The goal of the assessment was two-fold: understand what ESG risks Adyen is most exposed to and better understand Adyen's impact on global sustainability matters. Adyen's approach to the materiality assessment included the principle of double materiality as defined in the Corporate Social Reporting Directive (CSRD), which will be required for Adyen as of the financial year 2024.

Prior to performing the double materiality assessment, Adyen conducted a targeted materiality assessment on climate and environmental risk (hereafter: C&E risk) with the primary objective of better understanding the impact of C&E risks on Adyen. This risk assessment focused on C&E risk and was shared with De Nederlandsche Bank (DNB) as part of its supervisory review of all Dutch financial institutions.

The key findings of the 2023 C&E risk assessment are as follows:

- The assessment did not identify any new significant C&E high risk areas for Adyen and confirmed previously identified and disclosed higher risk areas;
- The assessment identified a number of new C&E risk areas, for example, from sectoral exposure with higher transition risks, however through quantification it is confirmed that these don't represent a significant C&E risk;
- The 2023 assessment provides the most comprehensive and up to date quantitative set of analyses and resulting evidence on C&E risk available to Adyen.

Once the C&E risk assessment was completed, Adyen expanded the scope of the materiality assessment to all ESG topics and also to the assessment of Adyen's impact on the ESG topics. The assessment, led by the Adyen ESG Working Group and Corporate Risk, was carried out by evaluating a long list of ESG topics, which were then assessed across several risk factors such as credit risk, market risk, operational risk, integrity risk, reputational risk, and financial risk. The assessment included both qualitative and quantitative considerations in addition to considering all possible transmission channels. Specifically for the CSRD topic of "Climate Change", the risk assessment leveraged the methodology and outcome of the C&E Risk Assessment. Other topics required risk management experts to meet with subject matter experts within the organization ranging from information security to commercial teams, and from finance to human resources. For the purpose of Pillar III, the focus remains on the risk assessment and its outcome.

To challenge and validate the outcome of the risk assessment, a stakeholder engagement process was executed. The ESG Working Group determined who in the business is best equipped and informed to serve as the internal experts per topic. All internal experts participated in interview sessions to explore Adyen's impacts, risks and opportunities around each sustainability topic. The internal experts also provided insights on Adyen's approaches, policies, and governance for each topic. This year, the Working Group short-listed and invited a handful of external stakeholders to participate in the assessment and provide their unique perspectives on the topics identified. The primary stakeholder engagement exercise was conducted via interviews where several standard questions were asked prior to an open discussion. As a result, the external perspective was based on input in the form of investor engagements, interviews, and ESG indices. The results from the materiality assessment, are presented to and approved by the Risk Committee, the Management Board and the Supervisory board. More extensive description of the ESG Materiality Assessment is presented in the Management Report of the 2023 Annual Report.

Environmental risk

Business strategy and processes

Adyen integrates environmental risks into business strategy, operations, and risk management through the design of its payment platform, organization, workforce, and overall business continuity. Through investing in its payments platform, new products and services, and human resources, Adyen proactively manages risks, including environmental risk. Adyen took the learnings from recent years to improve its approach in taking responsibilities for the impact it creates by investing in sustainable projects and contributing to efforts to slow down climate change. The full explanation of this approach is presented in the 2023 Annual Report.

Adyen is required to report on environmentally sustainable economic activities in line with EU taxonomy regulation (the "EU taxonomy"). The EU taxonomy was introduced to provide a common classification system for sustainable economic activities in support of the action plan on financial sustainable growth and EU's climate and energy targets for 2030. For the financial year 2023, new templates that include the presentation of the Green Asset Ratio (GAR) become applicable. In the newly applicable templates, credit institutions are required to present their eligibility and alignment ratio. As at December 31, 2023, based on the data available, Adyen's exposure to financing or investing in

taxonomy-eligible activities is well below 1% of total assets, and taxonomy-aligned exposures are 0% of total exposures. The low ratio is due to the nature of Adyen's business model, which is primarily based on processing and settling transactions and not investing in or financing specific taxonomy-eligible activities. Further, Adyen's exposures subject to eligibility and alignment to the Technical Screening Criteria, have a short-term duration, with residual maturities of days. As a result of this, Adyen has not set any targets relating to EU Taxonomy-aligned activities. For more information on methodologies and definitions used, refer to the EU Taxonomy Report section in the 2023 Annual Report.

Currently Adyen does not have any investments with exposure towards any of the environmental objectives. Starting from 2022, Adyen has committed to pledge 1% of its net revenue to support the United Nation Sustainability Development Goals (UN SDGs) and through this support a number of environmental focused initiatives. More information on the causes supported by the 1% pledge is presented in the Management Board Report of the 2023 Annual Report.

Adyen continues to diversify its global customer portfolio which is reflected in a lower concentration of customer risk as well as the environmental risk associated with our counterparties. A diversified customer portfolio, limits the overexposure to industries and regions, which could be specifically vulnerable to climate-related and environmental risks, both physical as well as transitional. Additionally, Adyen continues to actively engage with suppliers, partners, merchants, and other external stakeholders in addition to embedding Adyen's sustainable approach across all business operations.

Adyen has clearly defined policies and approaches to assess counterparties before engaging in any agreements as it is committed to upholding ethical behaviors when working with third parties and suppliers as further outlined in Adyen's Third-Party Management Policy. Adyen aims to only engage with parties that actively pursue compliance with safeguards as mandated by Dutch law, EU regulations, and the requirements mandated in the jurisdictions where Adyen operates. All partners and suppliers must also comply with all applicable regulations and laws regarding sustainability practices.

Risk management

The outcome of the C&E materiality assessment showed that residual environmental risks were determined to be less material to Adyen relative to social and governance risks. Physical environmental risks are addressed through Adyen's overall business continuity execution, which limits the residual risk to Adyen's operations in the situation that offices, data centers, or other key infrastructure or personnel becomes unavailable. The majority of Adyen's business finance offerings have limited maturity (< 12 months and often much less) and do not involve collateralized assets that pose a physical environmental risk. In addition, in order to better assess the exposure to transition risk, the EBA requires institutions to disclose information on exposures towards sectors that highly contribute to climate change. Template 1 (Banking book – climate change transition risk) as disclosed below, shows a breakdown of Adyen's exposures towards non-financial corporates operating in the sectors that highly contribute to climate change. Based on the classification of the exposures per NACE codes, as at 31st of December 2023, EUR 51.1 million are exposed to sectors that highly contribute to climate change. This amount is less than 1% of total assets. More information on this breakdown can be found in the 'Quantities disclosure' section. In 2023, Adyen's Capital offering was launched, which consists of short-term (6 - 9 month maturity) merchant loans and cash advances. This new product may change Adyen's environmental risk exposure due to changes to Adyen's maturity profile. However, the size of the this product's exposure in 2023 was negligible as it was only launched in December 2023.

New sustainability requirements such as CSRD and the EU Taxonomy are welcomed by Adyen as they provide more sector-wide insights into risk and impact of environmental topics. Typically, these type of regulations are more relevant for carbon-intensive companies or to financial institutions that hold substantial investment portfolios or credit portfolios that include physical exposure and collateral. Adyen continues to make this bias in the regulation explicit, as it explains to a large extent the limited applicability to a bank with a business model like Adyen, and as such the need for less sophistication in its framework.

In the C&E materiality assessment Adyen maps out the transmission channels of climate-related risk drivers to credit risk, reputational risk, strategic risk, and other using descriptive, qualitative judgement. These causal chains leading to (potential) impact are corroborated with internal stakeholders. The transmission channels in environmental risk are most prevalent through physical risk to our operations such as data centers, offices, and personnel. Adyen addresses this type of risk through its business continuity risk management and organizational resiliency. Furthermore, Adyen identifies that a sustainable approach to doing business is vital to maintain its license to operate in modern society.

From prioritizing the need to better understand and measure the company's own footprint to putting an emphasis on maximizing impact from funds contributed towards climate projects, notable improvements have been made. By working with a professional ESG data management platform, emissions can now be monitored throughout the course of the year as opposed to on an annual basis. This will aid in better tracking progress on reduction efforts once targets

are set in line with the Paris Agreement. In 2023, the team honed in on expanding the scope of the emissions calculation, improving on the methodology, and continued learning to enhance the accuracy of the calculation.

Adyen recognizes the importance of incorporating climate risk into its business strategy and risk and control frameworks. We evaluate residual climate risk during the company- wide and regional risk assessments. Adyen incorporates C&E risks in its risk appetite and strategy setting as Adyen aims to have minimal adverse impact from environmental risks and to drive sustainable change. Currently, Adyen has not set limitations on its financing operations in terms of environmental targets, objectives or otherwise.

Social risk

Business strategy and processes

Adyen integrates social risks into its business model and strategy primarily by adopting a series of policies aimed at limiting social risks and encouraging ethical behaviors and conduct throughout the business. Further, Adyen has focused on developing products that have a positive social impact. Adyen has established a prohibited and restricted list of products and services linked to sectors considered to be sensitive in social terms. Some of these sectors include, for example, animals and wildlife products classified as endangered or protected, hazardous material and trade of weapons, ammunition, military arms, explosive devices and firearm parts. With regards to building products aimed at having a positive social impact, Adyen has developed and rolled out Adyen Giving. Adyen Giving is a feature of the check-out process, which allows nonprofits to integrate on the sales channel of Adyen's existing merchants. By using Giving, merchants can partner up with their preferred nonprofits and shoppers can make donations during the check-out process in a seamless way. Adyen Giving is the first of Adyen's impact technology products but the suite of products is expected to expand in the coming years.

Adyen has made a number of commitments and has set out overarching objectives in relation to some of the material social topics in order to address social risks. One of the most significant commitments is the 1% of Adyen's net revenue dedicated to initiatives that support the UN SDGs. In 2022, Adyen announced that it would annually commit 1% of its net revenue to initiatives that support the UN SDGs. By aligning with this framework, Adyen's contribution will help accelerate change where it's needed most.

In 2023, Adyen updated its Diversity, Equity, and Inclusion Policy³² in-line with the requirement under the 2022 Dutch Corporate Governance Code. Thus, Adyen commits to the following statement:

Adyen is committed to ensure that our leadership (Global Leadership Team, Management Board, Supervisory Board) is a fair representation of the Company. We have defined the "subtop" as our Global Leadership Team. Therefore:

- We commit to having a Global Leadership Team ("subtop") with no more than two thirds of its members identifying as a single gender identity (66%) by 2028.
- We commit to having a Management Board with no more than two thirds of its members identifying as a single gender identity (66%) by 2030. The current size and composition of the Management Board requires Adyen to set a longer time horizon to achieve this commitment.
- We commit to having a Supervisory Board with no more than two thirds of its members identifying as a single gender identity (66%) by 2028. This is in line with Dutch statutory diversity targets.
- We are committed to hiring, promoting, and enabling growth of underrepresented groups across all levels and geographies of the organization.
- We aim to include underrepresented candidates in our hiring process, meaning that we measure the diversity of our candidate pipelines when possible and strive for a minimum of 30% of candidates to come from an underrepresented group considering relevant local demographic context and regional/functional objectives.
- We will ensure that individuals from underrepresented groups can be themselves, are able to speak up and be heard, and thrive at all levels of the organization.

Adyen recognizes its responsibility when it comes to mitigating and reducing socially harmful activities linked to its counterparties. Adyen has clearly defined policies and procedures to assess counterparties before engaging in any agreements as it's committed to upholding ethical behaviors when working with third parties and suppliers. Adyen has adopted a Third Party-Management Policy that clearly defines the assessment mandated before engaging in any agreements. Namely, Adyen aims to only engage with parties that actively pursue compliance with social safeguards as mandated by Dutch law (Child Labor Due Diligence Act), EU regulations (European Convention on Human Rights) and the requirements mandated in the jurisdictions where Adyen operates. All partners and suppliers must also comply with all applicable regulations and laws regarding human rights, child labor, and sustainability practices, and

³² Adyen's Diversity, Equity and Inclusion Policy: <https://investors.adyen.com/governance#policies>

where relevant, have in place all necessary AML controls. In defining these criteria, Adyen has also made reference to internationally recognized principles and frameworks, such as the Universal Declaration of Human Rights, the ten principles of the UN Global Compact, and the UN Sustainable Development Goals (SDGs). In addition, to uphold ethical behavior both inside and outside of Adyen, everyone at Adyen knows that they share the responsibility to prevent any acts contrary to generally accepted social or business conduct standards, or those which could seriously damage confidence in Adyen or in the financial industry. This is also reflected in Adyen's formula. The formula principles outline Adyen's way of working where making good choices is inherent to ethical behavior and trust. These principles have been key to the company's decision-making over the course of building Adyen and are key to encouraging an ethical work culture fundamental to mitigating a number of social risks. In addition to the Adyen Formula, Adyen has an internal compliance handbook which promotes integrity and ethical conduct. The compliance handbook is a central part of the onboarding process and is often used to train and educate the teams on the topics in the handbook.

Risk Management

Adyen also considers the risks it may encounter due to social developments. Specifically how its own workforce develops, the relationship with the societies in which it operates, and the political environment. For Adyen, social risk include factors which may impact or influence its workforce, ethical business practices (human rights, child labor, etc), personal data protection and impact the local communities in which Adyen operates. When assessing and reporting on these social risks/ factors, Adyen makes reference to internationally recognized principles and frameworks, such as the Universal Declaration of Human Rights, the ten principles of the UN Global Compact and the UN Sustainable Development Goals (SDGs). With the upcoming Corporate Sustainability Reporting Directive (CSRD), Adyen will further align its definitions and methodologies with the requirements outlined in the European Sustainability Reporting Standards (ESRS).

Through the materiality assessment discussed in more detail above, Adyen identified a number of social matters and risks most relevant for the Company. When identifying transmission channels for social risks, failed internal processes and internal or external events are considered. The material social matters and risks identified include non-discrimination (DEI), learning and development, employment practices and impact on local communities. These topics are both relevant from a risk and an impact perspective as Adyen recognizes not only how these factors play a role in the long-term value creation of the company but also how Adyen can support positive social change. Depending on the matter, different teams across the organization monitor exposures towards the identified risks. This is done through the identification of a series of metrics which are tracked in order to monitor any changes and to assess any trends. These metrics stretch from employee metrics (i.e gender ratios) to amounts donated to support the UN SDGs, to the number of data breaches (if any). In addition, with regards to social risks, Adyen also conducts a yearly culture and equal pay audit, and actively considers geopolitical developments in light of its supply chain as well as interest and inflation expectations.

For each material social matter, Adyen has implemented or planned activities and actions with the goal of either monitoring risk, limiting negative impact or enhancing positive impact. These are outlined in more detail in the 2023 Annual Report (Management Report). Each section details the initiatives which Adyen is involved in- stretching from local community initiatives such as employee volunteering to DEI recruitment activities and company-wide trainings.

With regards to tooling used for identification and management of social risk, Adyen relies on series of systems depending on the topic at hand. All workforce related data is managed and stored in Adyen's ERP, while business process documentation and internal control mapping is linked to a risk and compliance tool.

Governance risk

Adyen acknowledges the importance of strong governance within Adyen but also the governance performance of its counterparties which operate within Adyen's business environment such as its suppliers and merchants. The Compliance function, which reports directly to the CRCO, plays a key role in designing and strengthening Adyen's integrity controls when it comes to counterparty governance. The focus of the team is to establish global decision-making practices that allow everyone at Adyen to make ethical choices that continually inspire trust in all stakeholders and mitigate integrity related risks.

As anticipated in the Social Risk section, Adyen holds its suppliers to the same standard as it holds itself. With this in mind, Adyen has designed and implemented an onboarding process for third parties (e.g. suppliers) which includes an inherent (including overview of regulatory requirements, as well as security and data privacy risks) and residual risk assessment (including reference to all relevant mitigating measures and controls put in place), which is followed by a contractual phase and, for onboarded third parties, monitoring controls. On these grounds, Adyen classifies third parties into separate risk categories which prescribe which risk assessment steps, policies, and provisions are necessary for Adyen to accept a certain third party.

Before onboarding and offering services to any of its merchants, Adyen performs a risk assessment aimed at identifying potential risks, based on a number of factors including what activities are carried out and in which jurisdiction the merchant operates in, per relevant regulatory standards, also with the aim of determining whether the customer profile is within Adyen's risk appetite. The assessment is carried out in conjunction with Adyen's prohibited and restricted list of products and services and furthermore considers any adverse media or sanctions indications. With regards to customers who are availing of credit products (i.e. Adyen Capital), an additional credit assessment is performed. Through these assessments, Adyen is able to determine whether these customers are within Adyen's risk appetite and eligible to work with Adyen.

Finally, the company-wide Integrity Training is a testament to Adyen's commitment to ensure that Adyen operates in a safe and secure manner, and to ensure that suppliers uphold the highest ethical standards. The Compliance function runs a comprehensive Compliance Training which is globally mandatory for all employees. This required educational refresher ensures all teams and functions are properly informed about relevant developments. Emphasis is placed on topics such as ethical behavior, internal conduct risks (e.g. whistleblowing, third-party onboarding practices) and on risk management.

Quantitative information

All ten quantitative ESG templates have been assessed for applicability. It was concluded that only Template 3 is not yet applicable at 31 December 2023 and template 6, 7, 8, and 10 are applicable for the first time for disclosure per this publication. Template 3 (Banking book - Climate change transition risks) and Template 9 (Mitigating actions: BTAR) per regulation, requires access to alignment metrics which will be applicable for disclosure only after H1 of fiscal year 2024.

All templates that are applicable per regulation and are required to be disclosed in financial year 2023, are discussed in more detail below.

Template 1: Banking book – climate change transition risk: credit quality of exposures by sector, emissions and outstanding duration

Template 1 (see Annex ESG 1) gives the stakeholders information about Adyen's banking book, specifically the exposures towards non-financial corporates operating in carbon-related sectors and the quality of such exposures. This template only applies to financial exposures in the form of loans and advances, debt securities, and equity instruments. Carbon - related sectors are identified through the use of NACE codes associated with the counterparties.

All exposures are then assessed based on their quality and maturity. The quality of the exposures is measured through the status of the exposures - whether the exposure is performing, stage 2, or non-performing. The exposures are then grouped based on their maturity, starting with less than 5 years, 5 to 10 years, 10 to 15 years, and longer than 20 years maturity groups. Maturity information is relevant since climate change-related risks may materialize in the long term. Lastly, scope 1, 2, and 3 emissions of the counterparties must be disclosed in Template 1 (if possible) as an effort to show the company's financed emissions– alternatively, institutions are given the option to disclose its plans to provide actual or estimation of the emission data. Adyen plans on improving data availability to fulfill the mandatory requirement of financed emission which is required by financial year 2024.

As at 31st December 2023, Adyen holds EUR 407.2 million of exposures towards non-financial corporates. Of this amount, EUR 51.1 million is exposed to sectors that highly contribute to climate change which equates to less than 1% of Adyen's total assets. Therefore, Adyen's transitional risk exposure can be deemed immaterial for the Company.

Template 2 – Banking book - Climate change transition risk: Loans collateralized by immovable property - Energy efficiency of the collateral

Template 2 aims to show the relevant stakeholders Adyen's banking book exposure to loans that are collateralized by immovable property and the related energy efficiency. Similar to last year's disclosure, Adyen does not hold any loan products with physical collateral in its banking book during FY 2023.

Template 4 – Banking book - Climate change transition risk: Exposures to top 20 carbon-intensive firms

The purpose of template 4 is to show institutions' exposures towards the top 20 carbon-intensive companies in the world. It is complementary to the sectoral approach applied in the previous templates and provides a deeper insight with more granular data. Consistent with the 2022 disclosure, Adyen does not have any exposures towards any of the companies in the top 20 carbon-intensive firms list, therefore, this disclosure is not applicable for Adyen.

Template 5 – Banking book - Climate change physical risk: Exposures subject to physical risk

Template 5 gives stakeholders information on exposures in the banking book (including loans and advances, debt securities and equity instruments not held for trading and not held for sale) towards non-financial corporates, on loans collateralized with immovable property and on repossessed real estate collateral that are exposed to chronic and acute climate-related hazards. However, similar to the assessment for template 2, this template is also not applicable for Adyen. As at 31 December 2023, Adyen does not hold any loan product that entails any physical collateral, meaning that Adyen does not experience additional physical risks exposure from loan collaterals. Thus, this template is not applicable to Adyen.

Templates 6, 7, 8, and 10 - GAR disclosures

Templates 6 through 10, collectively address the Green Asset Ratio (GAR) and alignment with the EU Taxonomy Regulation which measures Adyen's asset and banking book's alignment with the EU Taxonomy's Technical Screening Criteria (TSC). These templates hold significance for Adyen as a public interest entity (PIE) and as a credit institution. These templates require the disclosures of information regarding Adyen's alignment with environmentally sustainable activities and sectors, financing of green projects, and strategies for mitigating climate-related risks. Data points such as exposures to climate-related hazards in the banking book, GAR and by environmental objectives, and actions to address climate risks are among the key requirements. The templates are provided in the annex of this document.

As at 31st December 2023, Adyen's stock GAR numerator is equal EUR 0 and EUR 3,705 million as denominator. This means that the GAR is 0% and Adyen's alignment with EU Taxonomy's TSC is zero. Then, when looking at the flow GAR, the ratio is 0%, meaning that Adyen has no alignment. The ratios are in-line with Adyen's business model and the nature of the assets and exposures that it holds in its balance sheet. Adyen's business model results in short-term (< 5 days) exposures in between settlements, meaning that the purpose of the asset in the banking book is not to address any of the six objectives included in the EU Taxonomy Regulation.

Annexes

Please note all annexes are denoted in EUR amounts, unless stated otherwise.

Annex EU CC1 - Composition of regulatory own funds³⁴

Template EU CC1

Composition of regulatory own funds

		(a)
		Amounts
Common Equity Tier 1 (CET1) capital: instruments and reserves		
1	Capital instruments and the related share premium accounts	390,353,154
	of which: Paid-up capital	310,331
	of which: Share premium	390,042,823
2	Retained earnings	1,902,961,726
3	Accumulated other comprehensive income (and other reserves)	133,656,776
EU-3a	Funds for general banking risk	
4	Amount of qualifying items referred to in Article 484 (3) CRR and the related share premium accounts subject to phase out from CET1	
5	Minority interests (amount allowed in consolidated CET1)	
EU-5a	Independently reviewed interim profits net of any foreseeable charge or dividend	282,173,226
6	Common Equity Tier 1 (CET1) capital before regulatory adjustments	2,709,144,882
Common Equity Tier 1 (CET1) capital: regulatory adjustments		
7	Additional value adjustments (negative amount)	(16,221)
8	Intangible assets (net of related tax liability) (negative amount)	(8,756,797)
9	Not applicable	
10	Deferred tax assets that rely on future profitability excluding those arising from temporary differences (net of related tax liability where the conditions in Article 38 (3) CRR are met) (negative amount)	(90,985,112)
11	Fair value reserves related to gains or losses on cash flow hedges of financial instruments that are not valued at fair value	
12	Negative amounts resulting from the calculation of expected loss amounts	
13	Any increase in equity that results from securitised assets (negative amount)	
14	Gains or losses on liabilities valued at fair value resulting from changes in own credit standing	
15	Defined-benefit pension fund assets (negative amount)	
16	Direct, indirect and synthetic holdings by an institution of own CET1 instruments (negative amount)	
17	Direct, indirect and synthetic holdings of the CET 1 instruments of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)	
18	Direct, indirect and synthetic holdings by the institution of the CET1 instruments of financial sector entities where the institution does not have a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)	
19	Direct, indirect and synthetic holdings by the institution of the CET1 instruments of financial sector entities where the institution has a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)	
20	Not applicable	
EU-20a	Exposure amount of the following items which qualify for a RW of 1250%, where the institution opts for the deduction alternative	
EU-20b	of which: qualifying holdings outside the financial sector (negative amount)	
EU-20c	of which: securitisation positions (negative amount)	
EU-20d	of which: free deliveries (negative amount)	
21	Deferred tax assets arising from temporary differences (amount above 10% threshold, net of related tax liability where the conditions in Article 38 (3) CRR are met) (negative amount)	
22	Amount exceeding the 17,65% threshold (negative amount)	
23	of which: direct, indirect and synthetic holdings by the institution of the CET1 instruments of financial sector entities where the institution has a significant investment in those entities	

³⁴ Upon formal confirmation, Adyen's net profit for H2 2022 (EUR 282 million) may be included in its CET1 calculation. At that point, Adyen's CET1 capital becomes EUR 2,254 million.

		(a) Amounts
24	Not applicable	
25	of which: deferred tax assets arising from temporary differences	
EU-25a	Losses for the current financial year (negative amount)	
EU-25b	Foreseeable tax charges relating to CET1 items except where the institution suitably adjusts the amount of CET1 items insofar as such tax charges reduce the amount up to which those items may be used to cover risks or losses (negative amount)	
26	Not applicable	
27	Qualifying AT1 deductions that exceed the AT1 items of the institution (negative amount)	
27a	Other regulatory adjustments	
28	Total regulatory adjustments to Common Equity Tier 1 (CET1)	(99,758,130)
29	Common Equity Tier 1 (CET1) capital	2,609,386,752
Additional Tier 1 (AT1) capital: instruments		
30	Capital instruments and the related share premium accounts	
31	of which: classified as equity under applicable accounting standards	
32	of which: classified as liabilities under applicable accounting standards	
33	Amount of qualifying items referred to in Article 484 (4) CRR and the related share premium accounts subject to phase out from AT1	
EU-33a	Amount of qualifying items referred to in Article 494a(1) CRR subject to phase out from AT1	
EU-33b	Amount of qualifying items referred to in Article 494b(1) CRR subject to phase out from AT1	
34	Qualifying Tier 1 capital included in consolidated AT1 capital (including minority interests not included in row 5) issued by subsidiaries and held by third parties	
35	of which: instruments issued by subsidiaries subject to phase out	
36	Additional Tier 1 (AT1) capital before regulatory adjustments	
Additional Tier 1 (AT1) capital: regulatory adjustments		
37	Direct, indirect and synthetic holdings by an institution of own AT1 instruments (negative amount)	
38	Direct, indirect and synthetic holdings of the AT1 instruments of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)	
39	Direct, indirect and synthetic holdings of the AT1 instruments of financial sector entities where the institution does not have a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)	
40	Direct, indirect and synthetic holdings by the institution of the AT1 instruments of financial sector entities where the institution has a significant investment in those entities (net of eligible short positions) (negative amount)	
41	Not applicable	
42	Qualifying T2 deductions that exceed the T2 items of the institution (negative amount)	
42a	Other regulatory adjustments to AT1 capital	
43	Total regulatory adjustments to Additional Tier 1 (AT1) capital	
44	Additional Tier 1 (AT1) capital	
45	Tier 1 capital (T1 = CET1 + AT1)	2,609,386,752
Tier 2 (T2) capital: instruments		
46	Capital instruments and the related share premium accounts	
47	Amount of qualifying items referred to in Article 484(5) CRR and the related share premium accounts subject to phase out from T2 as described in Article 486(4) CRR	
EU-47a	Amount of qualifying items referred to in Article 494a(2) CRR subject to phase out from T2	
EU-47b	Amount of qualifying items referred to in Article 494b(2) CRR subject to phase out from T2	
48	Qualifying own funds instruments included in consolidated T2 capital (including minority interests and AT1 instruments not included in rows 5 or 34) issued by subsidiaries and held by third parties	
49	of which: instruments issued by subsidiaries subject to phase out	
50	Credit risk adjustments	

		(a)
		Amounts
51	Tier 2 (T2) capital before regulatory adjustments	
Tier 2 (T2) capital: regulatory adjustments		
52	Direct, indirect and synthetic holdings by an institution of own T2 instruments and subordinated loans (negative amount)	
53	Direct, indirect and synthetic holdings of the T2 instruments and subordinated loans of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)	
54	Direct, indirect and synthetic holdings of the T2 instruments and subordinated loans of financial sector entities where the institution does not have a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)	
54a	Not applicable	
55	Direct, indirect and synthetic holdings by the institution of the T2 instruments and subordinated loans of financial sector entities where the institution has a significant investment in those entities (net of eligible short positions) (negative amount)	
56	Not applicable	
EU-56a	Qualifying eligible liabilities deductions that exceed the eligible liabilities items of the institution (negative amount)	
EU-56b	Other regulatory adjustments to T2 capital	
57	Total regulatory adjustments to Tier 2 (T2) capital	
58	Tier 2 (T2) capital	
59	Total capital (TC = T1 + T2)	2,609,386,752
60	Total Risk exposure amount	4,672,510,189
Capital ratios and requirements including buffers		
61	Common Equity Tier 1 capital	55.85 %
62	Tier 1 capital	55.85 %
63	Total capital	55.85 %
64	Institution CET1 overall capital requirements	9.13 %
65	of which: capital conservation buffer requirement	2.50 %
66	of which: countercyclical capital buffer requirement	— %
67	of which: systemic risk buffer requirement	— %
EU-67a	of which: Global Systemically Important Institution (G-SII) or Other Systemically Important Institution (O-SII) buffer requirement	— %
EU-67b	of which: additional own funds requirements to address the risks other than the risk of excessive leverage	— %
68	Common Equity Tier 1 capital (as a percentage of risk exposure amount) available after meeting the minimum capital requirements	45.66 %
National minima (if different from Basel III)		
69	Not applicable	
70	Not applicable	
71	Not applicable	
Amounts below the thresholds for deduction (before risk weighting)		
72	Direct and indirect holdings of own funds and eligible liabilities of financial sector entities where the institution does not have a significant investment in those entities (amount below 10% threshold and net of eligible short positions)	
73	Direct and indirect holdings by the institution of the CET1 instruments of financial sector entities where the institution has a significant investment in those entities (amount below 17.65% thresholds and net of eligible short positions)	
74	Not applicable	
75	Deferred tax assets arising from temporary differences (amount below 17,65% threshold, net of related tax liability where the conditions in Article 38 (3) CRR are met)	

		(a) Amounts
Applicable caps on the inclusion of provisions in Tier 2		
76	Credit risk adjustments included in T2 in respect of exposures subject to standardised approach (prior to the application of the cap)	
77	Cap on inclusion of credit risk adjustments in T2 under standardised approach	
78	Credit risk adjustments included in T2 in respect of exposures subject to internal ratings-based approach (prior to the application of the cap)	
79	Cap for inclusion of credit risk adjustments in T2 under internal ratings-based approach	
Capital instruments subject to phase-out arrangements (only applicable between 1 Jan 2014 and 1 Jan 2022)		
80	Current cap on CET1 instruments subject to phase out arrangements	
81	Amount excluded from CET1 due to cap (excess over cap after redemptions and maturities)	
82	Current cap on AT1 instruments subject to phase out arrangements	
83	Amount excluded from AT1 due to cap (excess over cap after redemptions and maturities)	
84	Current cap on T2 instruments subject to phase out arrangements	
85	Amount excluded from T2 due to cap (excess over cap after redemptions and maturities)	

Annex EU CCA - Main features of regulatory own funds instruments and eligible liabilities instruments

Template EU CCA

Main features of regulatory own funds instruments and eligible liabilities instruments

		a
		Qualitative or quantitative information - Free format
1	Issuer	Adyen N.V.
2	Unique identifier (e.g. CUSIP, ISIN or Bloomberg identifier for private placement)	NL0012969182
2a	Public or private placement	Public
3	Governing law(s) of the instrument	The shares are governed by the laws of the Netherlands
3a	Contractual recognition of write down and conversion powers of resolution authorities	N/A
Regulatory treatment		
4	Current treatment taking into account, where applicable, transitional CRR rules	Common Equity Tier 1
5	Post-transitional CRR rules	Common Equity Tier 1
6	Eligible at solo/(sub-)consolidated/ solo&(sub-)consolidated	Consolidated
7	Instrument type (types to be specified by each jurisdiction)	CET1 as published in the EBA list (art. 26(3))
8	Amount recognised in regulatory capital or eligible liabilities (Currency in million, as of most recent reporting date)	80,000,000
9	Nominal amount of instrument	0.01
EU-9a	Issue price	240
EU-9b	Redemption price	Not applicable
10	Accounting classification	Shareholders' equity
11	Original date of issuance	13 June 2018
12	Perpetual or dated	Perpetual
13	Original maturity date	No maturity
14	Issuer call subject to prior supervisory approval	No
15	Optional call date, contingent call dates and redemption amount	Not applicable
16	Subsequent call dates, if applicable	Not applicable
Coupons / dividends		
17	Fixed or floating dividend/coupon	Floating
18	Coupon rate and any related index	Not applicable
19	Existence of a dividend stopper	No
EU-20a	Fully discretionary, partially discretionary or mandatory (in terms of timing)	Fully discretionary - no dividend pushers, dividend stoppers or ACSM
EU-20b	Fully discretionary, partially discretionary or mandatory (in terms of amount)	Fully discretionary
21	Existence of step up or other incentive to redeem	No
22	Noncumulative or cumulative	Non-cumulative
23	Convertible or non-convertible	Non-convertible
24	If convertible, conversion trigger(s)	Not applicable
25	If convertible, fully or partially	Not applicable
26	If convertible, conversion rate	Not applicable
27	If convertible, mandatory or optional conversion	Not applicable
28	If convertible, specify instrument type convertible into	Not applicable
29	If convertible, specify issuer of instrument it converts into	Not applicable

		a
		Qualitative or quantitative information - Free format
30	Write-down features	No
31	If write-down, write-down trigger(s)	Not applicable
32	If write-down, full or partial	Not applicable
33	If write-down, permanent or temporary	Not applicable
34	If temporary write-down, description of write-up mechanism	Not applicable
34a	Type of subordination (only for eligible liabilities)	Subordinated to all claims
EU-34b	Ranking of the instrument in normal insolvency proceedings	Subordinated to all claims
35	Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument)	Subordinated to all claims
36	Non-compliant transitioned features	No
37	If yes, specify non-compliant features	Not applicable
